

【Summer, Brick Wall】

Leaves, Trees, House

【Flying Ace】

Ceiling

【Figurine】

Linus 【Brick Wall】

The parts in this issue are the Leaves, background Trees and House on the Slope of the 【Summer, Brick Wall】 scene. Also included are the Ceiling parts for the 【Flying Ace】 scene and Linus figurine for the 【Brick Wall】 scene.

In this issue

In this issue

LEAVES, TREES, HOUSE

We will scatter the Leaves over the Slope to make the 【Brick Wall】 scene more colourful and assemble the Trees and House in the background to complete the scene.

Figurine

Linus

Figurine for the
【Brick Wall】 scene

CEILING

We will start assembling the Ceiling of the 【Flying Ace】 scene. First, align the Circuit Board and secure it in place by tightening the screws.

Lucy also shares her troubles at the brick wall but, forthright as ever, insists on direct answers instead of a variety of opinions. Linus, who sometimes likes to play innocent, surprises his sister with his sardonic retort.

ASSEMBLY INSTRUCTIONS

Affixing the Leaves, Trees and House

【Flying Ace】

Assembling the Ceiling

In this issue, we will glue the Leaves over the Slope and assemble the Trees and House in the background of the 【Brick Wall】 scene. We will also assemble and secure the Circuit Board to the Ceiling of the 【Flying Ace】 scene by tightening the screws.

Parts of issue 28

- ① Ceiling ② Circuit Board ③ Connection Cable ④ Screw (PM2×4mm)×3 (1 for spare) ⑤ Trees ⑥ House ⑦ Leaf Sheet A ⑧ Leaf Sheet B ⑨ Leaf Sheet C 【Figurine】 ⑩ Linus

AFFIXING THE LEAVES, TREES AND HOUSE

1

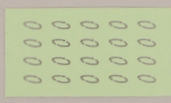

⑦ Leaf Sheet A

Use a cutter to cut and remove each Leaf from the joints of ⑦ Leaf Sheet A.

2

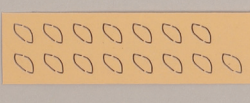

⑧ Leaf Sheet B

Remove the Leaves from ⑧ Leaf Sheet B in the same way.

3

⑨ Leaf Sheet C

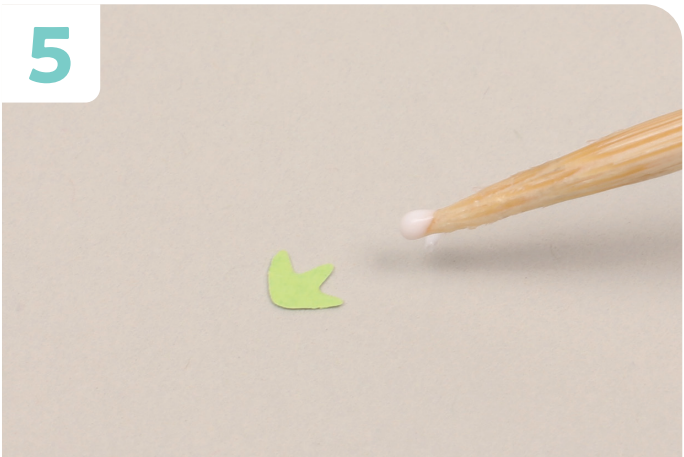

Next, cut and remove the Leaves from the joints of ⑨ Leaf Sheet C.

4

Get ready the 【Brick Wall】 scene assembled in issue 27 and remove the figurines on display.

5

We will now glue the Leaves of ⑦~⑨ Leaf Sheets A~C over the Slope—dab a little glue on the Leaves with the tip of a toothpick or the like as shown.

Affixing the Leaves, Trees and House

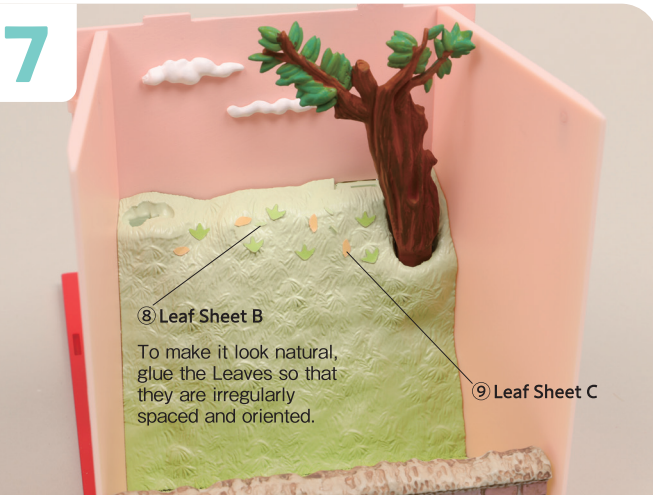

6

Leaves are not needed at the top.

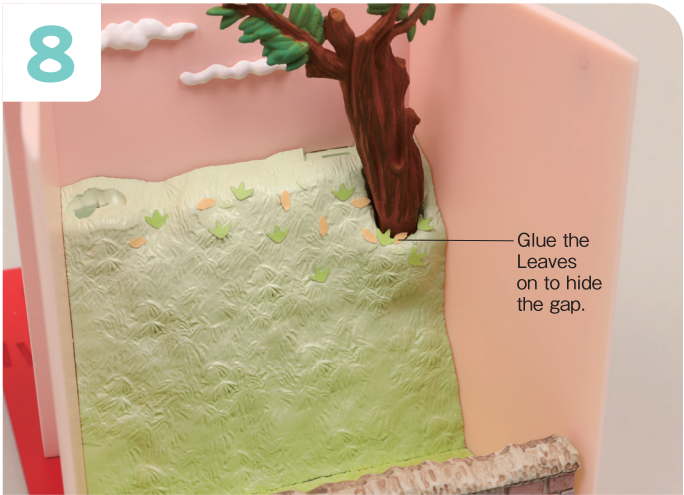

We will start glueing the Leaves from the top of the Slope. Glue the largest Leaves of ⑦ Leaf Sheet A first. Balance the spacing between the Leaves as you glue them.

7

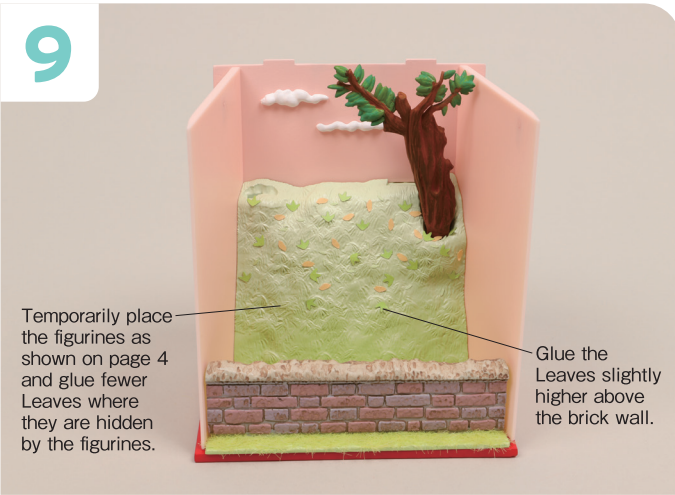

Balance the Leaves of ⑧ Leaf Sheet B and ⑨ Leaf Sheet C between the ⑦ Leaf Sheet A Leaves as you glue them.

8

Glue slightly more Leaves at the base of the Tree to hide the gap.

9

Glue the Leaves slightly higher above the brick wall in the same way. You may glue fewer Leaves where they are hidden by the figurines.

10

⑤ Trees

Assemble the ⑤ Trees to the left rear of the Slope. Match the shapes of the ⑤ Trees' protrusion and the hole of the Slope and insert it.

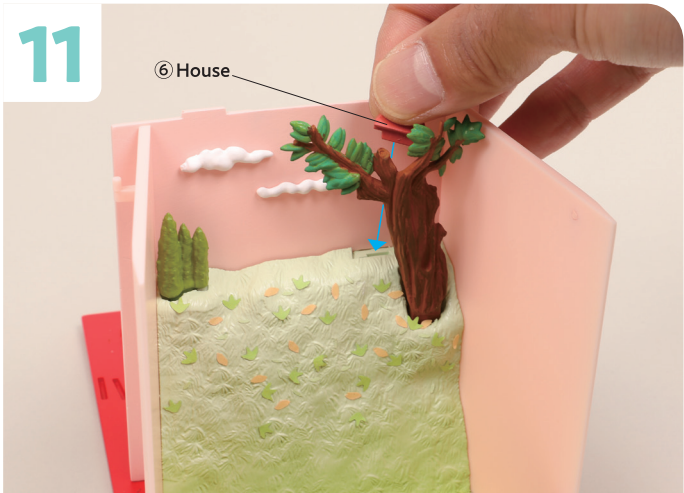

If it tends to come off, apply quick-drying glue to secure it in place.

ASSEMBLY INSTRUCTIONS

Affixing the Leaves, Trees and House

Assemble the ⑥House to the right rear of the Slope in the same way.

Issue 28 Completed

With the background added to the [Brick Wall] scene, we can now display the three figurines to complete the scene.

Adding the figurines

Place the Lucy figurine from issue 26 behind the Short Wall. Align her elbows with the indentations on the wall to set her in position.

We can apply quick-drying glue to the indentations on the wall to hold the figurine in place.

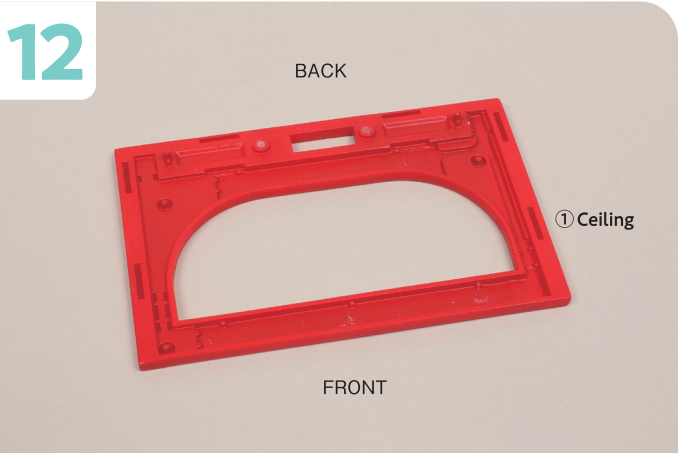

Place the Charlie Brown figurine from issue 27 next to Lucy in the same way.

Then place the ⑩Linus figurine next to Charlie Brown.

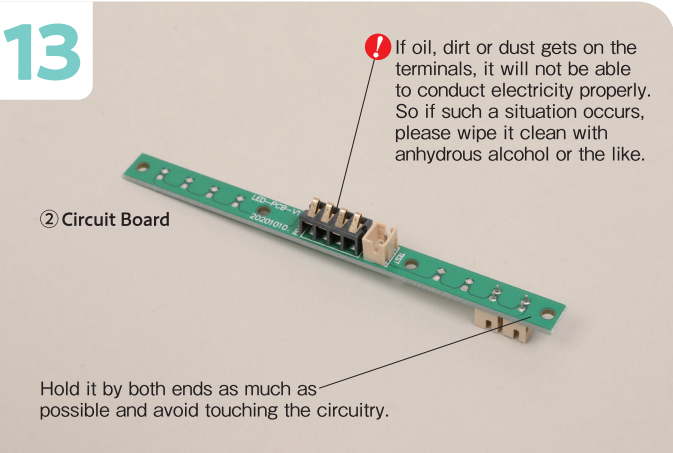

ASSEMBLING THE CEILING

12

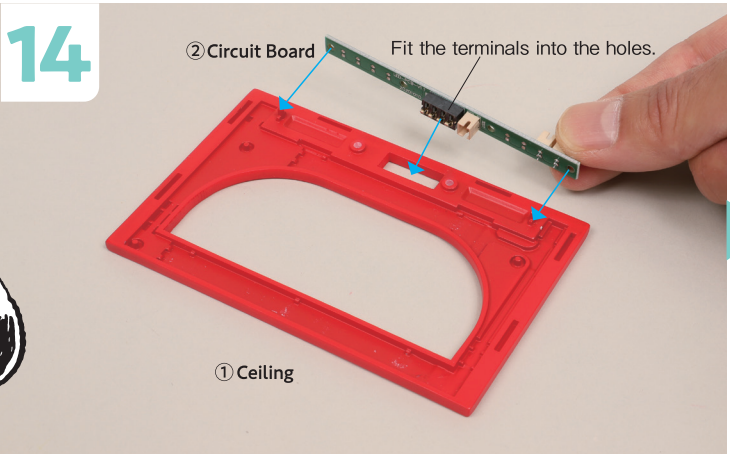

Check the orientation of the ①Ceiling—the uneven side with protrusions and holes will be the inner side that connects the Circuit Board after assembly.

13

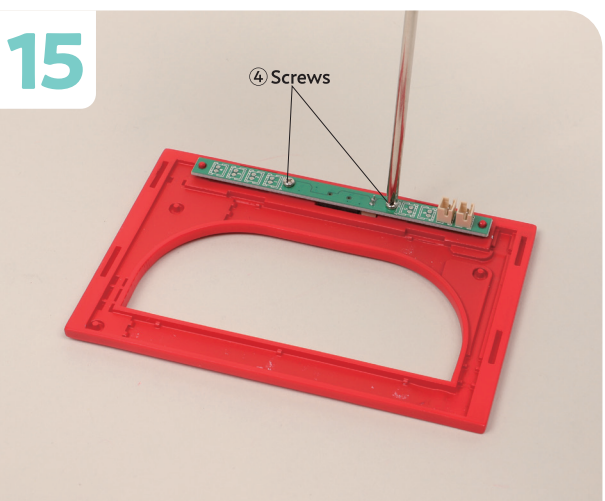

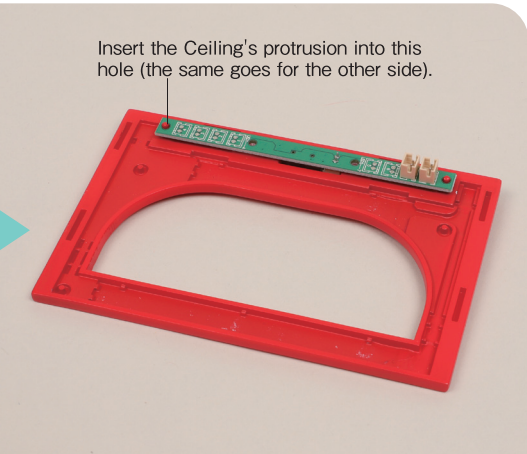

Try to hold the ②Circuit Board by both ends as much as possible and avoid touching the circuitry. Also, be very careful not to touch the terminals in the middle, as oil on your hands, dust and dirt can get on them and prevent the electricity from conducting properly.

14

Assemble the ②Circuit Board to the ①Ceiling by fitting its terminals into the holes of the Ceiling and inserting the Ceiling's protrusions into the holes on the left and right.

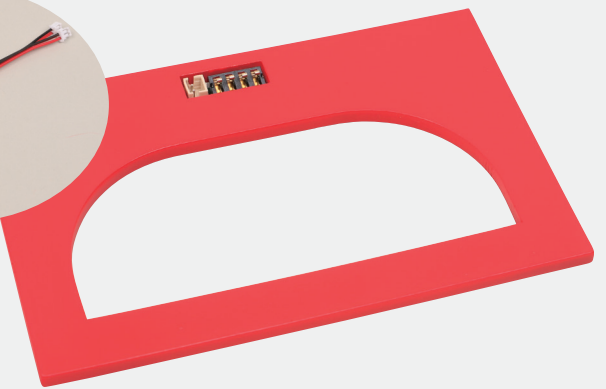

Tighten the ④Screws one by one into the two holes on the ②Circuit Board to secure it in place.

Issue 28 Completed

③ Connection Cable

In a later issue, we will assemble the Ceiling with LEDs and other components and use the ③Connection Cable to connect the Battery Box, so please take good care of them.
