In this issue

In this issue

The parts in this issue are LEDs and other parts for the 【Figurine Box, Flying Ace】 scene, and the Exterior walls and Ceiling for the 【Figurine Box, Joe Cool】 scene. Also included are the Milk Carton parts and Sally figurine for the 【Break Time, Eating Together】 scene.

CEILING, LEDs

We will complete the 【Flying Ace】 scene by installing the LEDs into the Ceiling of the 【Figurine Box, Flying Ace】 scene.

Figurine

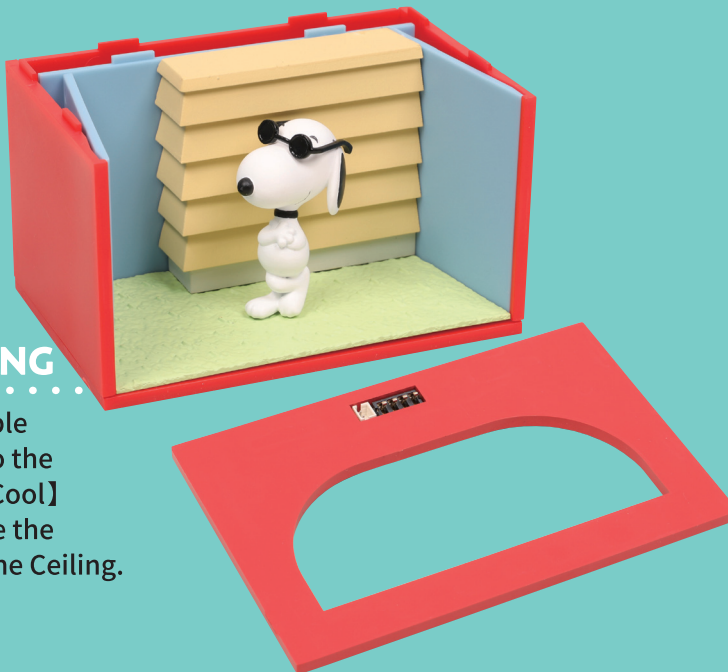

Sally

Figurine for the 【Eating Together】 scene

EXTERIOR WALLS, CEILING

We will also assemble the Exterior Walls to the 【Figurine Box, Joe Cool】 scene and assemble the Circuit Board into the Ceiling.

MILK CARTON

And make the Milk Carton Sally is holding in the 【Break Time, Eating Together】 scene.

ASSEMBLY INSTRUCTIONS

Assembling the Exterior Walls and Ceiling

【Break Time, Eating Together】

Making the Milk Carton

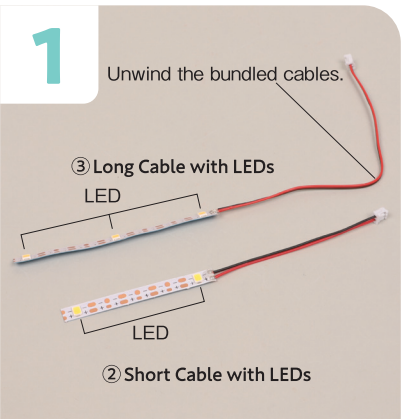

We will complete the 【Figurine Box, Flying Ace】 scene in this issue. We will also assemble the Exterior walls and Ceiling for the 【Figurine Box, Joe Cool】 scene and make the Milk Carton for the 【Break Time, Eating Together】 scene.

Parts of issue 32

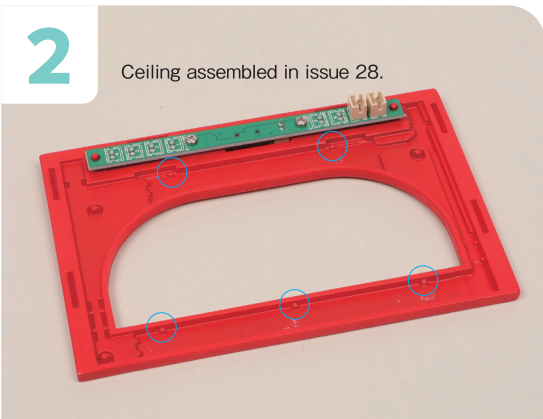

- ① Inner Panel ② Short Cable with LEDs ③ Long Cable with LEDs ④ Ceiling ⑤ Circuit Board ⑥ Left Exterior Wall ⑦ Right Exterior Wall ⑧ Rear Wall ⑨ Screw (PM2×6 mm)×3(1 for spare) ⑩ Screw (PM2×4 mm)×3(1 for spare) ⑪ Milk Carton 【Figurine】 ⑫ Sally

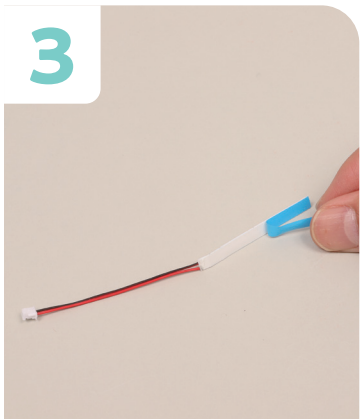

ASSEMBLING THE CEILING AND LEDS

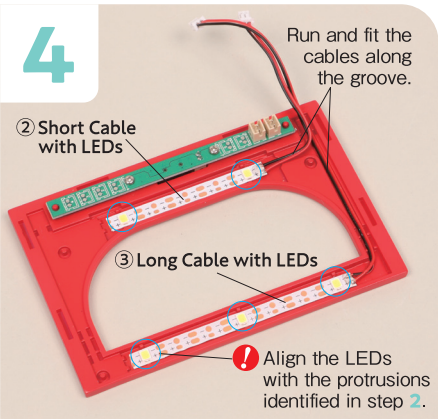

There are LEDs in two places on the ② Short Cable with LEDs and in three places on the ③ Long Cable with LEDs.

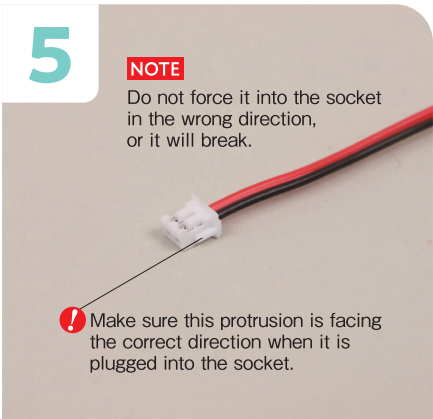

Get ready the Ceiling of the 【Figurine Box, Flying Ace】 scene assembled in issue 28, and identify the protrusions circled in blue. Align the LEDs with these protrusions and affix the cables with LEDs.

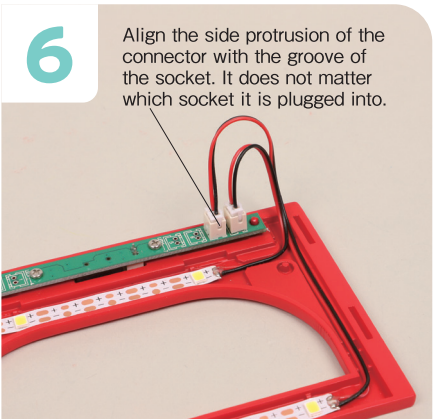

Remove the plastic film from the sticker side of the ② Short Cable with LEDs and ③ Long Cable with LEDs as shown to affix them.

Align the LEDs with the protrusions identified in step 2, then fit and affix the ② Short Cable with LEDs and ③ Long Cable with LEDs into the indentations in the Ceiling.

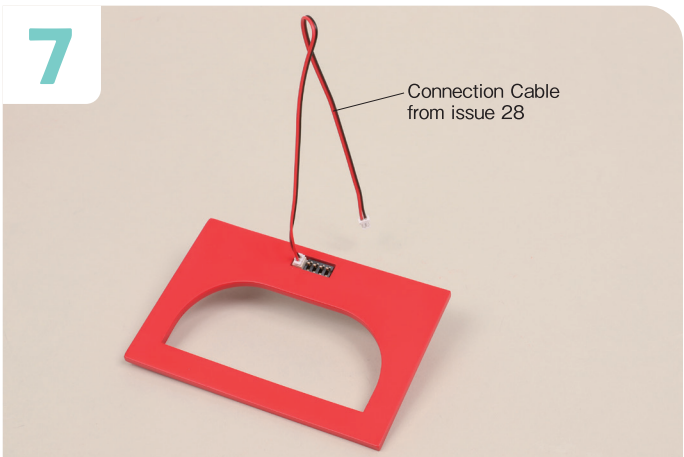

Check the connector at the end of the cables with LEDs—its front and back are different in shape. Make sure the side protrusion is facing the correct direction.

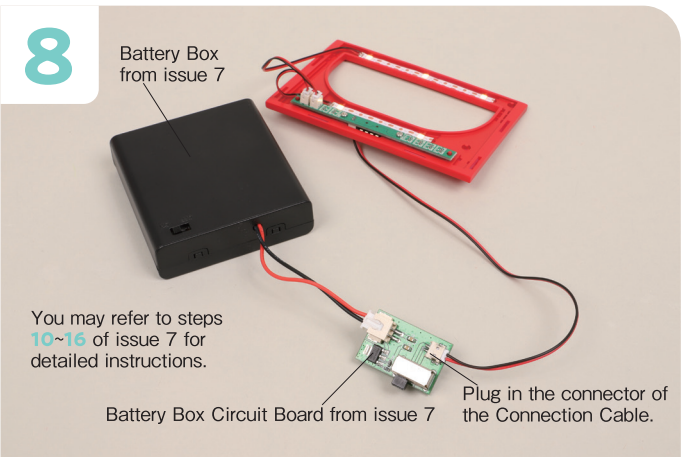

Plug the connectors of the ② Short Cable with LEDs and ③ Long Cable with LEDs into the sockets of the Circuit Board.

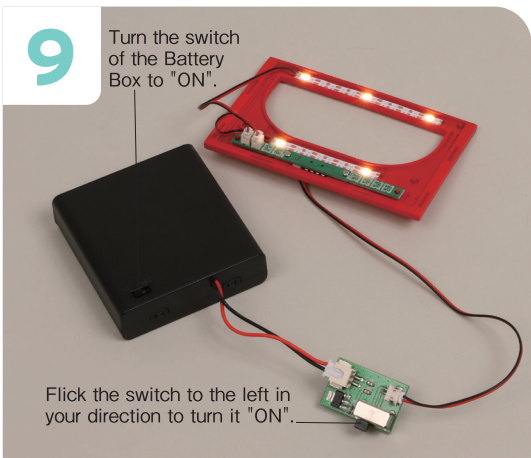

Assembling the Ceiling and LEDs

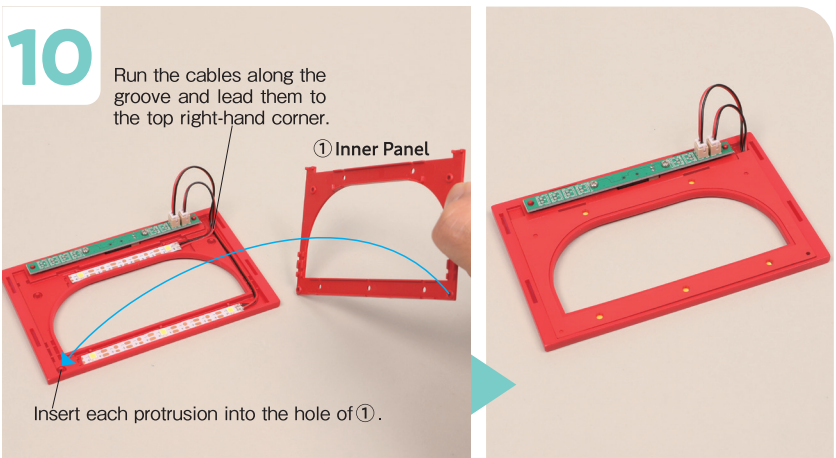

Now we can check if the LEDs light up properly. First, plug the connector of the Connection Cable from issue 28 into the socket protruding from the other side of the Ceiling.

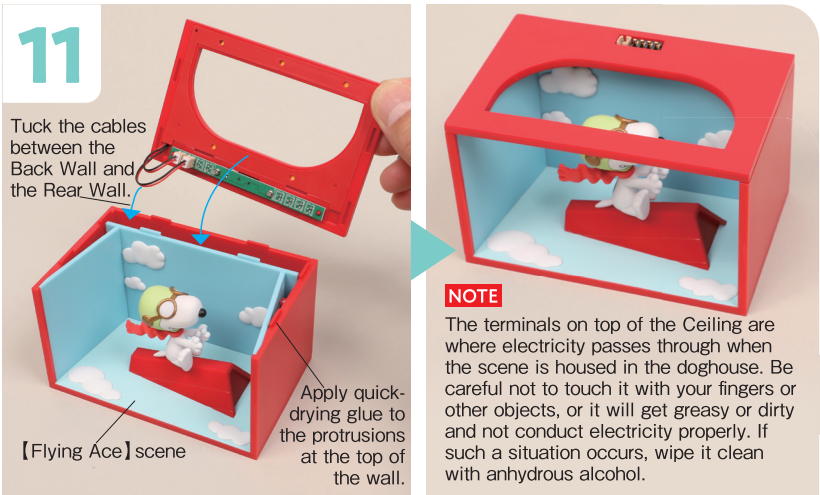

Connect the Battery Box with batteries and the other end of the Connection Cable from step 7 to the Battery Box Circuit Board in the same way as in issue 7.

Flick the switch of the Battery Box Circuit Board to light up the LEDs. After checking that the LEDs light up properly, disconnect the Battery Box, the Battery Box Circuit Board and the Connection Cable.

Now assemble the ① Inner Panel to the Ceiling. Apply a little quick-drying glue if it tends to come off.

Get ready the 【Flying Ace】 scene, apply quick-drying glue to the protrusions at the top of the wall and assemble the Ceiling as shown.

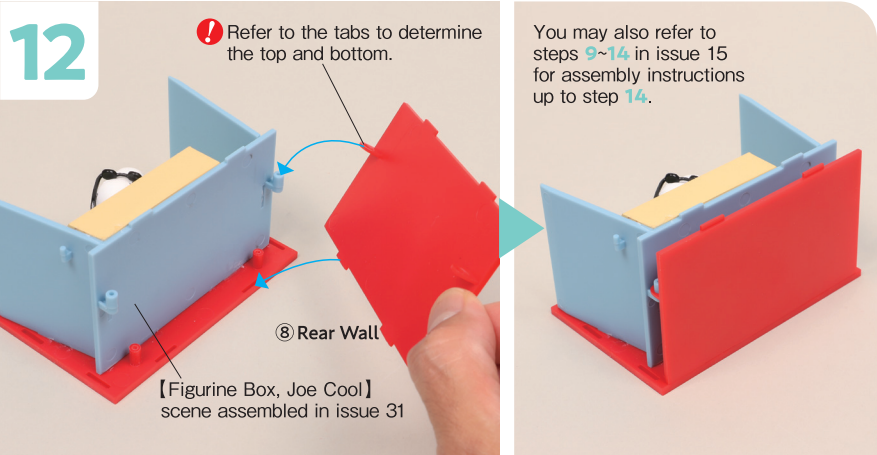

Issue 32 Completed

That finishes the 【Figurine Box, Flying Ace】 scene. To enjoy the scene with the LEDs on, plug the connector of the Connection Cable into the socket on top of the Ceiling and connect it to the Battery Box.

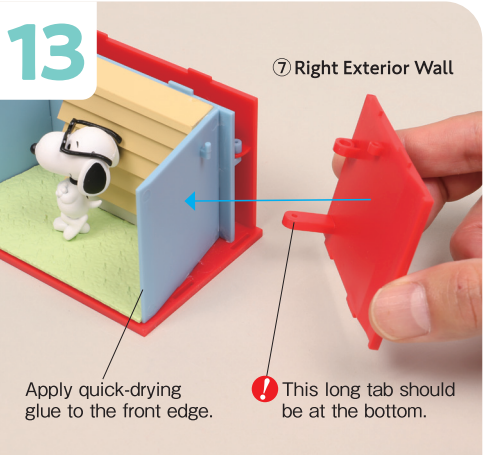

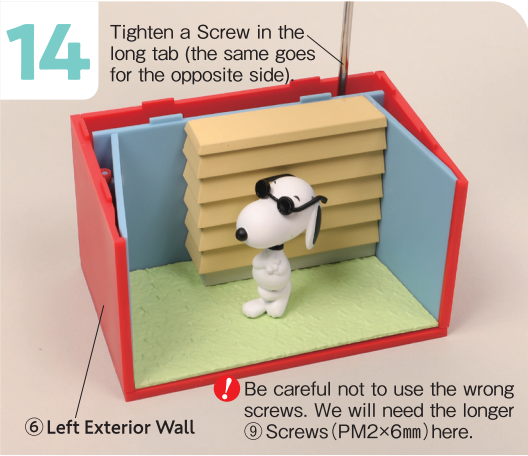

ASSEMBLING THE EXTERIOR WALLS AND CEILING

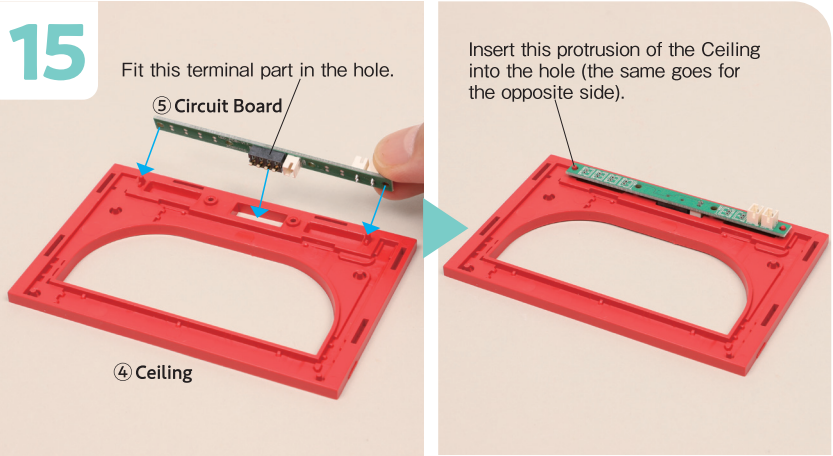

Get ready the 【Figurine Box, Joe Cool】 scene assembled in issue 31 and assemble the ⑧ Rear Wall behind the Back Wall.

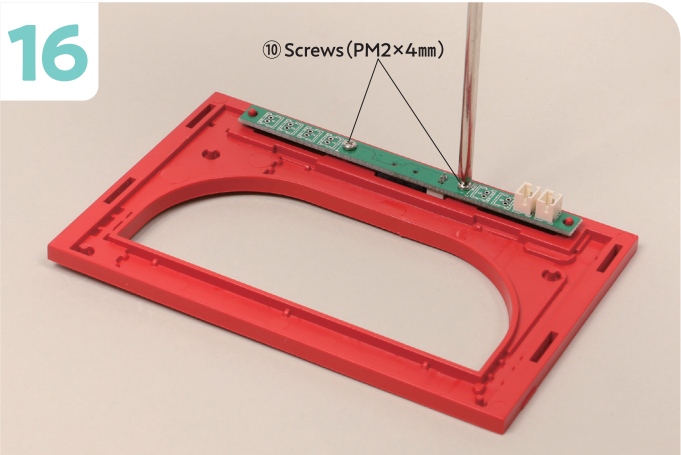

Apply quick-drying glue to the front edge of the Right Wall and assemble the ⑦ Right Exterior Wall.

Assemble the ⑥ Left Exterior Wall in the same way, then tighten the ⑨ Screws (PM2x6mm) in the long tabs of the Left and Right Exterior Walls to secure them in place.

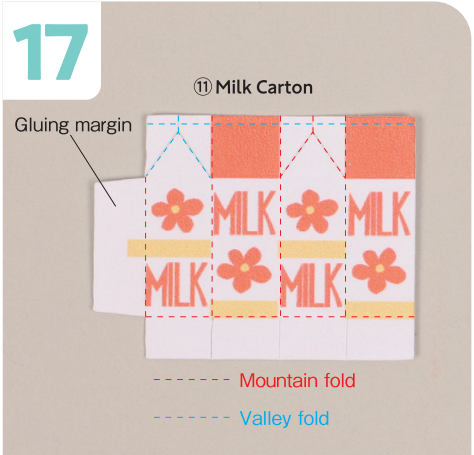

Next, assemble the ⑤ Circuit Board into the ④ Ceiling. Fit the Circuit Board's terminal part in the hole in the Ceiling and the protrusions into its holes on the left and right.

Tighten a ⑩ Screw (PM2x4mm) in each of the two holes of the ⑤ Circuit Board to secure it in place.

MAKING THE MILK CARTON

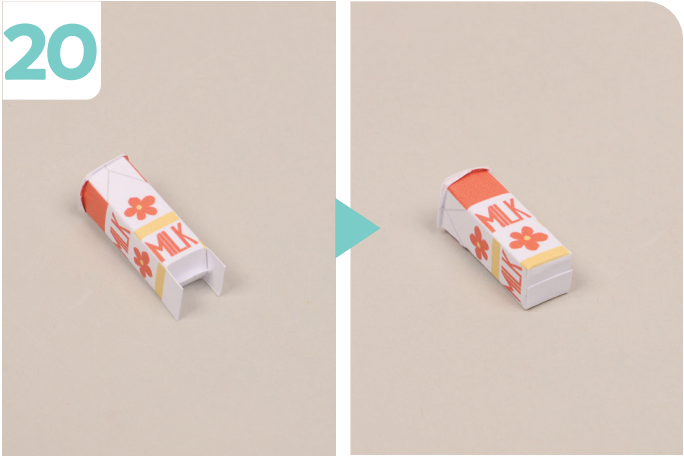

Check the ⑪ Milk Carton-The red dotted lines represent mountain folds, while the blue dotted lines represent valley folds.

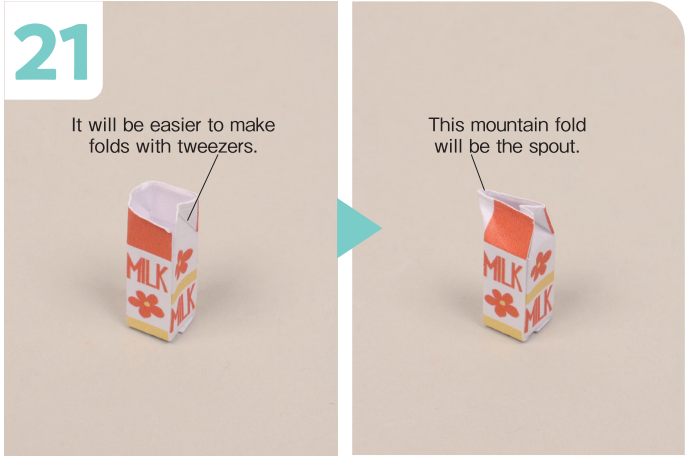

First, fold the top edge as shown.

Fold at the four vertical lines marked in step 17 and apply wood glue to the gluing margin to join the edges.

Fold and glue the underside in vertical and then horizontal order.

Fold it at the mountain and valley fold lines marked in step 17 (see left photo) and shape it.

Apply wood glue to the top edge of the valley fold with the tip of a toothpick or the like.

Better hold it in place with tweezers until the glue dries. Shape the spout and it is done.

That finishes the Milk Carton Sally is holding in the 【Break Time, Eating Together】 scene. Please take good care of it along with the Sally figurine.
