ASSEMBLING THE BACK WALL AND CLOUDS

1

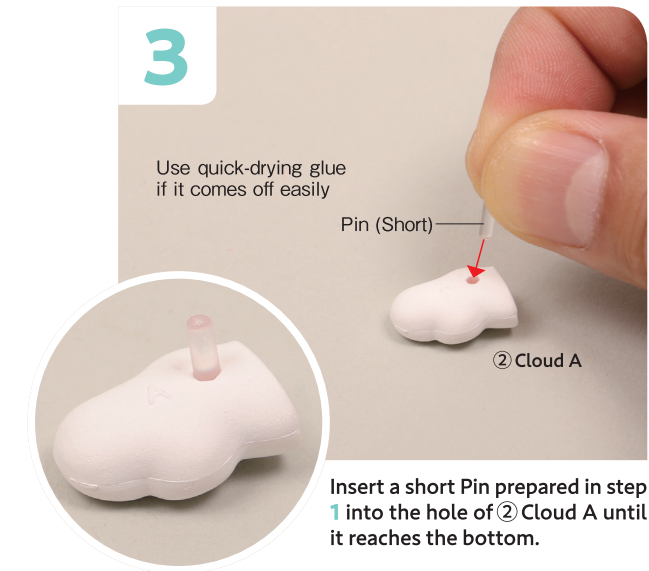

Use a cutter to cut and remove the ⑥ Pins from the joints. But if you cut them directly, they will probably scatter all over the place and be lost; so it is recommended that you tape them in place as shown before doing so. Please get one long Pin and three short Pins ready.

2

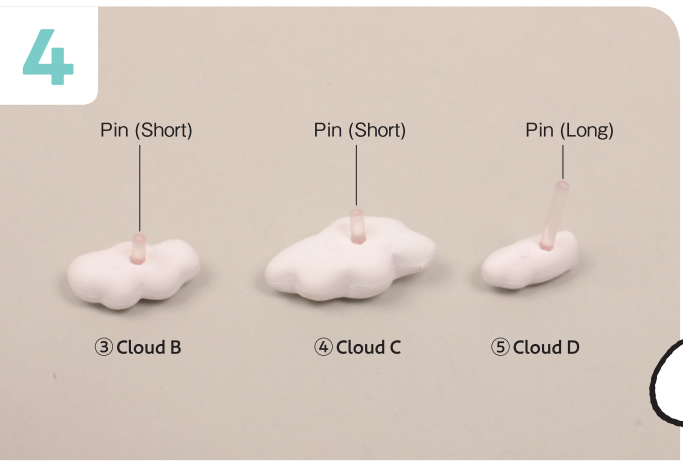

Identify the shapes and facing directions of the ② ~ ⑤ Clouds A~D.

3

Insert a short Pin prepared in step 1 into the hole of ② Cloud A until it reaches the bottom.

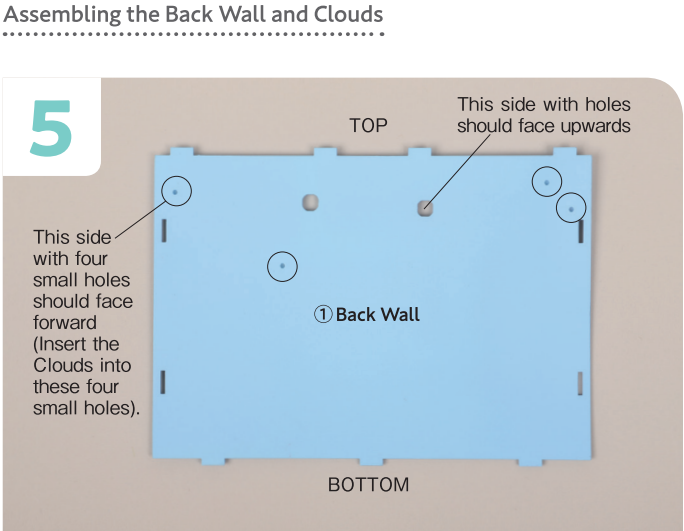

4

Insert in the same way the prepared short Pins into the holes of ③ Cloud B and ④ Cloud C, then insert the long Pin into the hole of ⑤ Cloud D until it reaches the bottom.

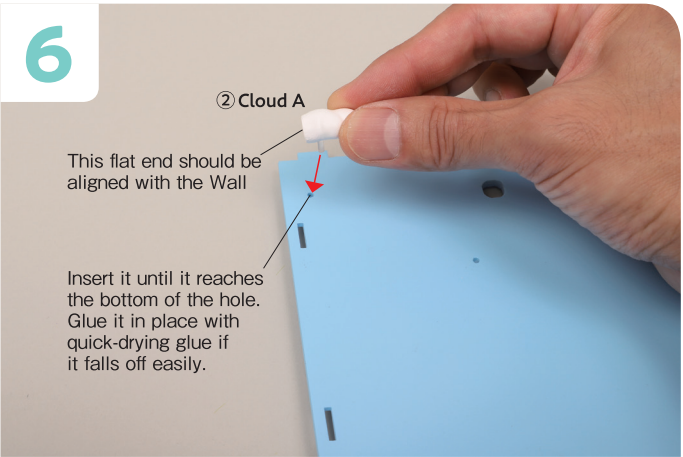

5

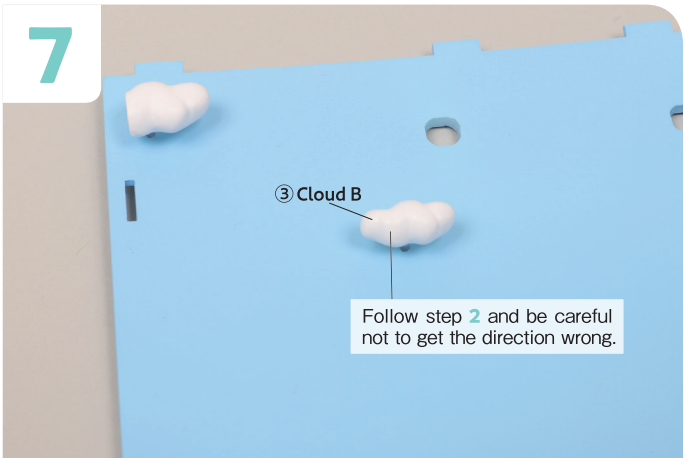

We can now assemble the Clouds onto the Back Wall. First, identify the assembly direction of the ① Back Wall. Be careful not to get the holes in the wrong direction.

6

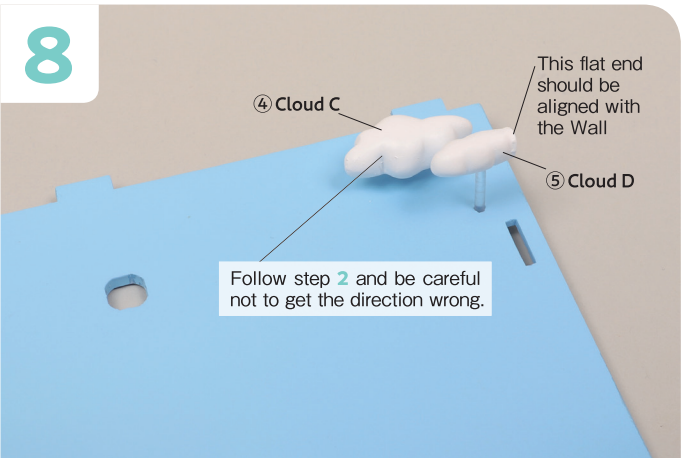

Insert the Pin of ② Cloud A into the small hole in the upper left corner of the ① Back Wall.

7

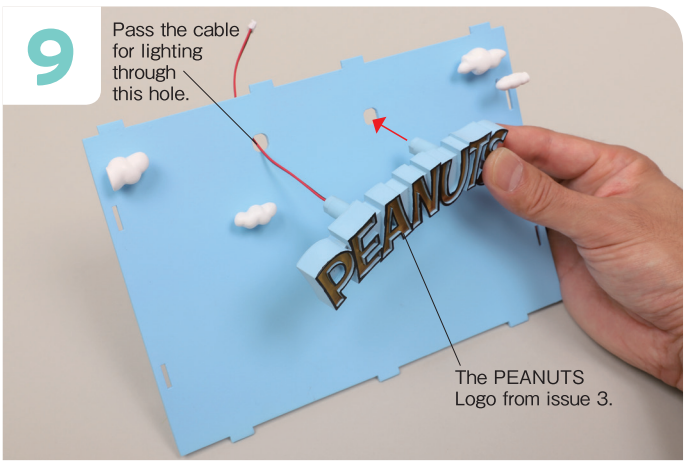

Assemble ③ Cloud B into the small hole nearby in the same way.

8

Next, assemble ④ Cloud C and ⑤ Cloud D into the two holes in the upper right corner.

9

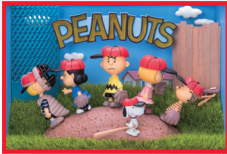

Assemble the PEANUTS Logo completed in issue 3 onto the Back Wall. Pass the cable for lighting through the hole on the left and insert the second protruding hole all the way in.

Issue 4 Completed

That finishes the Back Wall. Clouds have been added onto the light blue Wall as the sky backdrop, giving a sense of distance. In the next issue, we will assemble the Back Wall with the Floor.

⑪ Cushion D

Stuff the ⑨~⑪ Cushions with Cotton and seal their openings in the same way.

It is OK to simply sew the opening up without glue too!

Fold both edges about 1mm inwards and sew them together with a thread of similar color.

Issue 4 Completed

That finishes the Cushions. Let's put the Cushions evenly on the Sofa in the 【Relaxing at Home】 scene to decorate it.

Using the Craft Glue

Open the inner cap to use it.

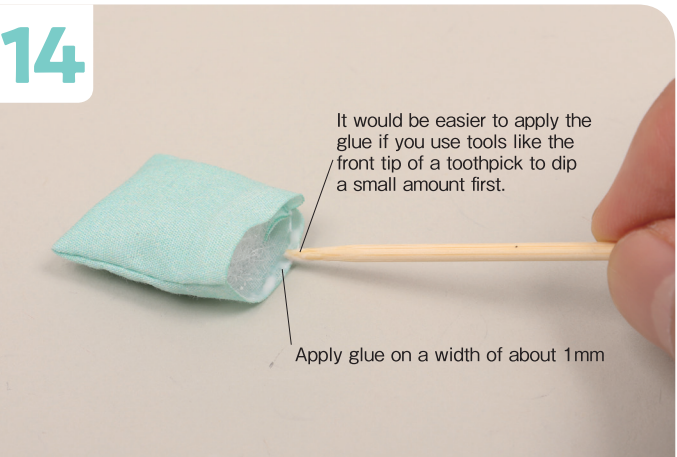

⑬ Craft Glue

After opening the cap and nozzle of the ⑬ Craft Glue, there is an inner cap. Open the inner cap to use it. As with quick-drying glue, if you are worried about using too much glue in one go, you can dip a small amount with tools like a toothpick.

14

It would be easier to apply the glue if you use tools like the front tip of a toothpick to dip a small amount first.

Apply glue on a width of about 1mm

Apply glue to the inner side of the Cushion opening, about 1mm wide.

Let's decorate the Pitcher's Mound with the figurines

In the 【Baseball Team】 scene, the one standing on the far right of the Pitcher's Mound is Linus. Let's try decorating it with ⑫ Linus figurine by inserting the protrusions under his feet into the slit on the far right of the Pitcher's Mound.

※ These figurines should be detached during assembly, so do not use any adhesive to attach it in place yet.
