Remove the Lake Surface on the front, then apply a little quick-drying glue to the three protrusions as indicated above and reassemble and glue it in place.

For those who wish to add extra details to the lake

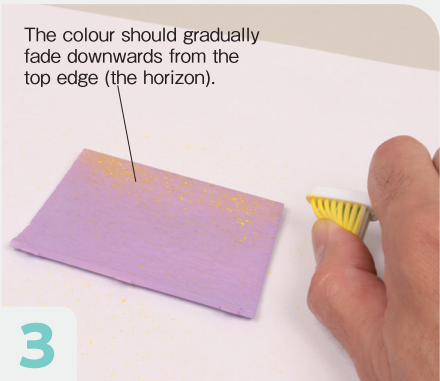

Modellers who wish to can add a touch of colour on the Lake Surface parts to simulate the shimmering reflection of the sunset.

Mix yellow with an equal amount of water and a few drops of neutral detergent. We will apply the paint with an unwanted toothbrush.

Dip the toothbrush in a small amount of paint and flick it with your fingertips to spatter the paint on the upper Lake Surface. Better practise on some unwanted paper before applying the paint.

Slowly lighten the colour from the top edge of the Lake Surface (the horizon) downwards.

Mix lame paint with an equal amount of water and a few drops of neutral detergent, then coat it to the surface to add shimmer.
