

【Winter, Santa Claus】

Ornaments, Floor, Partition

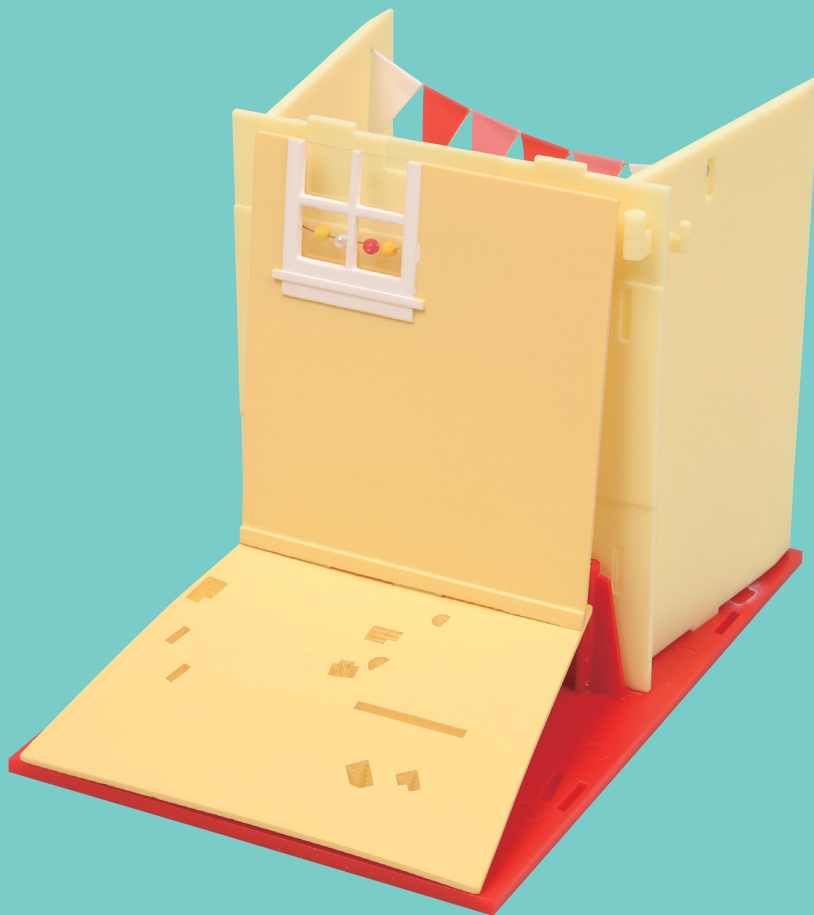

【Figurine】

Sally

【Santa Claus】

In this issue

This issue includes the window Ornament, Floor and Partition parts for the 【Santa Claus】 scene, and the figurine is Sally for the same scene.

Figurine

Sally

Figurine for the
【Santa Claus】 scene

ORNAMENTS, FLOOR, PARTITION

We will start assembling the 【Santa Claus】 scene in this issue by first making the Ornaments to bring some colour to the window. Let's check out how to assemble the Floor and Partition.

※ Actual parts may vary from the photos.

【Winter, Santa Claus】

Making the Ornaments Assembling the Floor and Partition

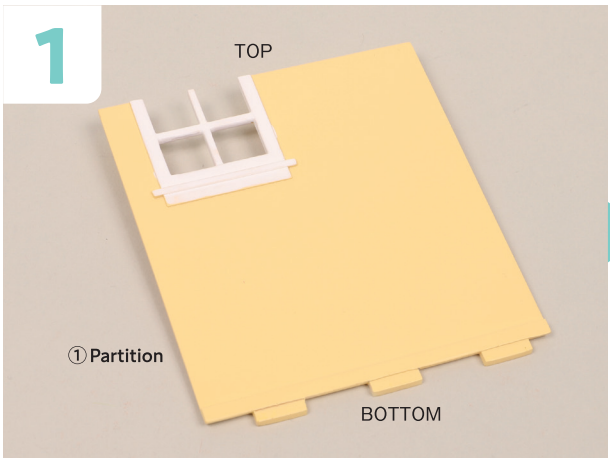

We will start assembling the 【Santa Claus】 scene in this issue by first making the Ornaments to bring some colour to the window. Let's check out how to assemble the Floor and Partition.

① Partition ② Floor ③ Wire ④ Plastic Sheet ⑤ Bead×5 【Figurine】 ⑥ Sally

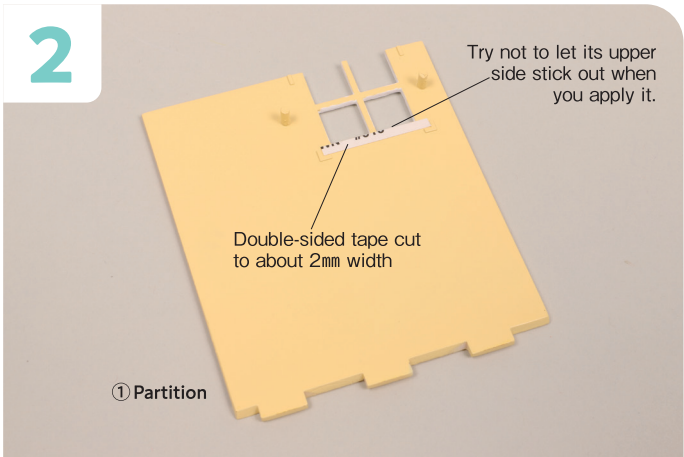

Parts of issue 47

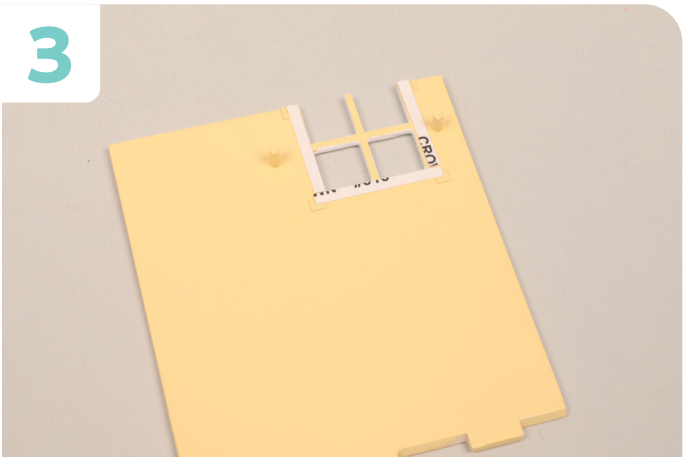

MAKING THE ORNAMENTS

Check the orientation of the ① Partition-affix the Plastic Sheet to the backside of the window muntins.

Cut a piece of double-sided tape of about 2mm width and apply it under the window on the back of the ① Partition.

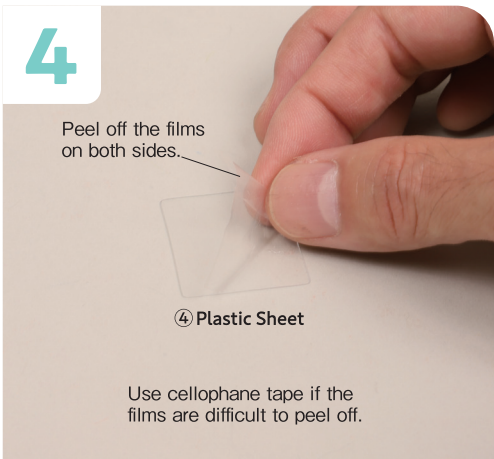

Apply double-sided tape of about 2mm width to the left and right sides of the window in the same manner.

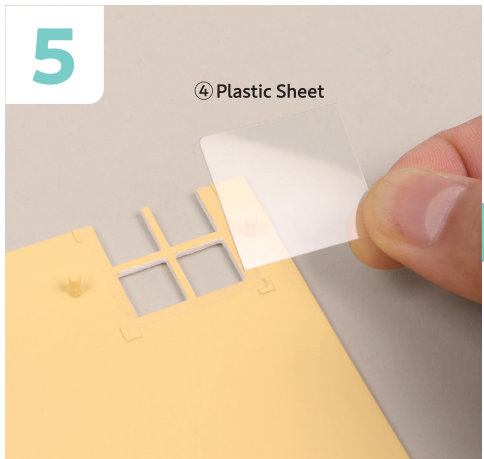

【Winter, Santa Claus】

Making the Ornaments

There is a protective film on both sides of the ④ Plastic Sheet, peel them off before assembly.

Peel off the backings of the double-sided tapes surrounding the window muntins of the Partition and affix the ④ Plastic Sheet. Be careful not to let it stick out of the top edge of the wall.

Be careful not to let it stick out of the top edge of the wall.

For those who wish to add extra details to the Beads

Modellers who wish to can paint the ⑤ Beads red and yellow to make them more colourful.

Mix yellow paint with a few drops of neutral detergent without adding water.

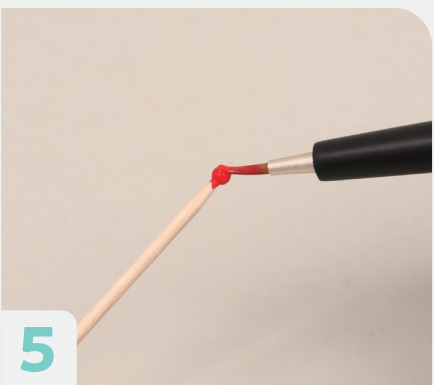

Insert the ⑤ Bead into the tip of a toothpick that serves as the handle for painting.

Dip a brush in the paint and apply it to the Beads. Here we will paint two Beads yellow.

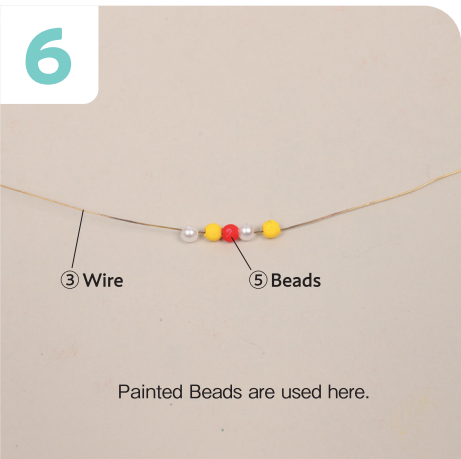

Now mix red paint with a few drops of neutral detergent without adding water.

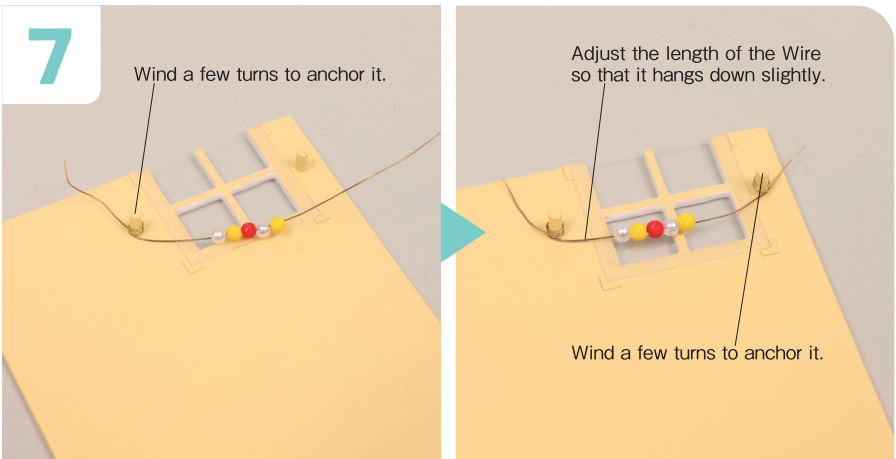

Apply the paint to one bead as in step 3.

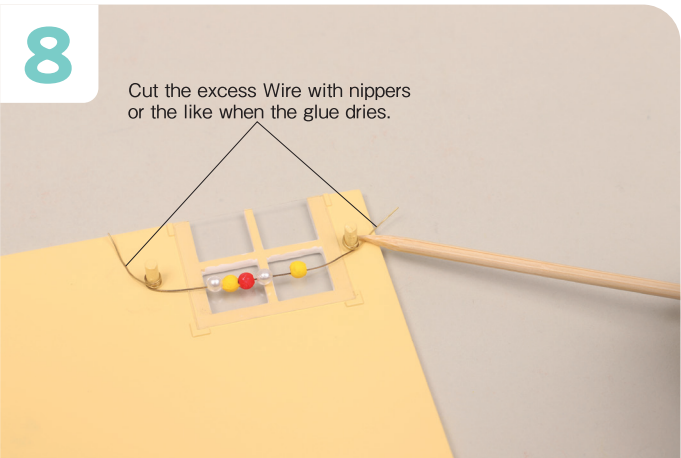

Making the Ornaments

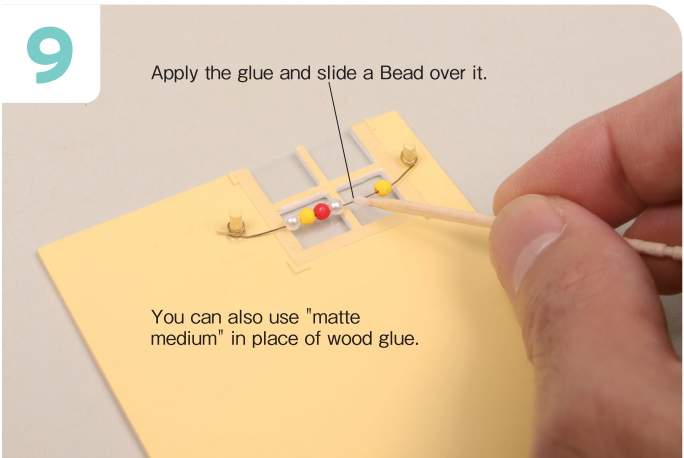

String five ⑤ Beads on the ③ Wire.

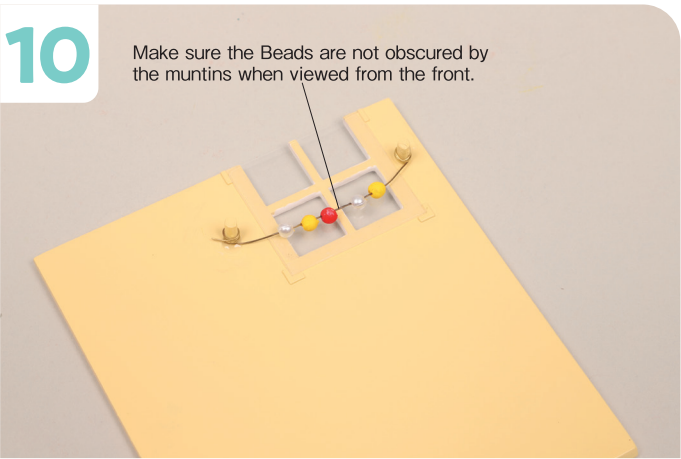

Wind one end of the Wire a few turns around the protrusion by the window to anchor it, taking care not to let the Beads fall out. Adjust the length of the Wire so that it hangs down slightly, and wind the other end around the protrusion on the opposite side.

Apply a little quick-drying glue to the protrusions on both sides of the window with the tip of a toothpick or the like to secure it in place. When dry, cut the excess Wire with nippers or the like.

Now apply wood glue to secure the Beads. Dip the tip of a toothpick in the glue and apply it to the Wire, then slide a Bead over the glue.

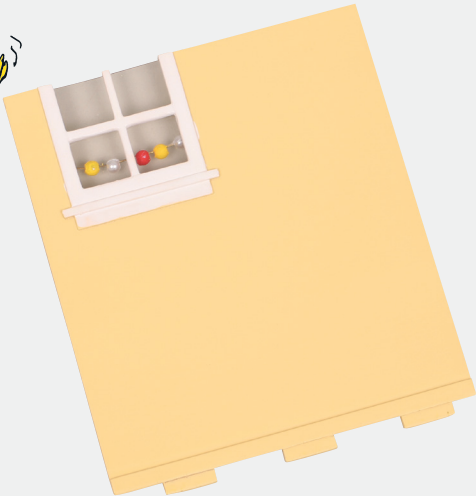

Secure the remaining Beads as in step 9. Space the Beads evenly and make sure they are not obscured by the muntins when viewed from the front.

Issue 47 Completed

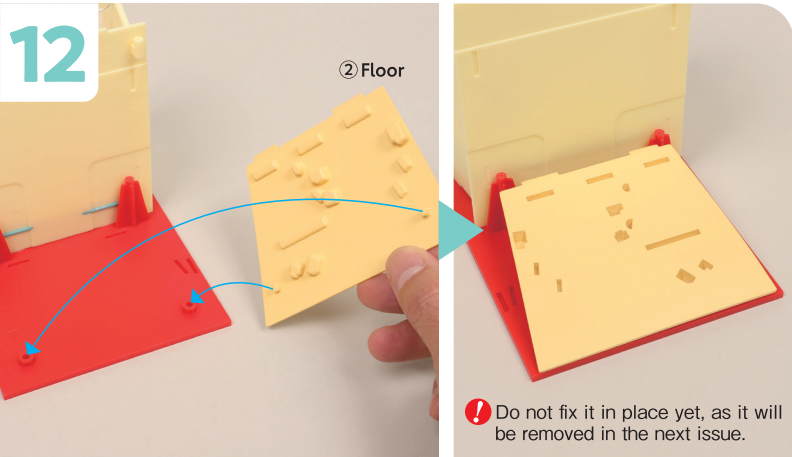

The Ornaments have now been added to the window of the Partition. Let's go on to see how the Partition and Floor should be assembled.

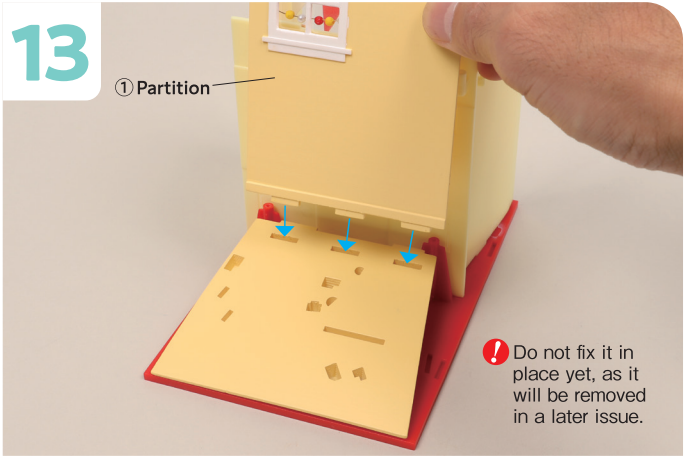

ASSEMBLING THE FLOOR AND PARTITION

The [Santa Claus] scene is on the other side of the [Ice Cream] scene. First, get ready the [Ice Cream/Santa Claus] scene box assembled so far.

The ① Partition and ② Floor will be fixed in a later issue. For now, we will assemble them unfixed. First, assemble the ② Floor to the Floorboard by inserting its protrusions into the holes in the floorboard as indicated above.

For the ① Partition, insert its bottom protrusions into the holes in the Floor.

Issue 47 Completed

That finishes the assembly of this issue. We will assemble the Left and Right Walls and more in the next issue.

Displaying the figurine

Align the protrusions under ⑥ Sally's feet with the indentations in the Floor to assemble it. Do not glue it in place yet, as it will be removed in the next issue.
