

【Summer/Winter, Surfboard/Figure Skating】

## LEDs

【Doghouse】

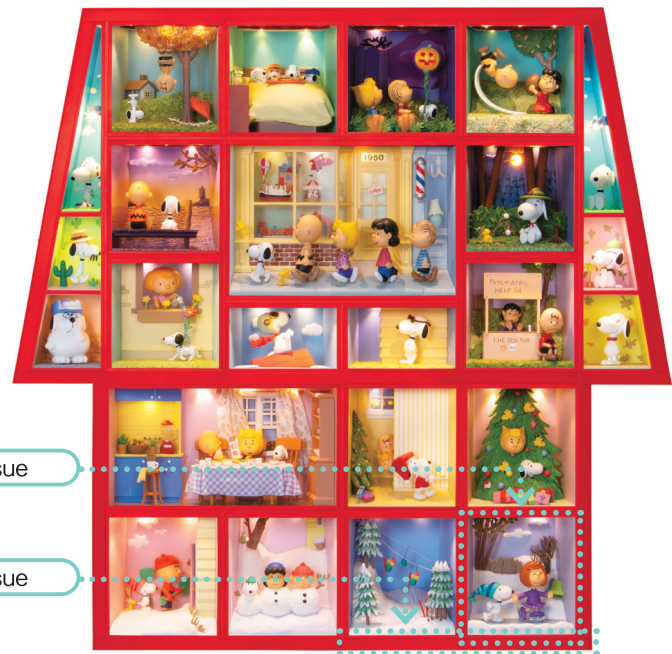

## Base Plate

【Figurine】

## Woodstock

【Shovelling Snow】

The parts in this issue are the LEDs for the 【Surfboard/Figure Skating】 scene. Also included is the bottom part of the doghouse body that holds each scene box, and the figurine is Woodstock for the 【Shovelling Snow】 scene.

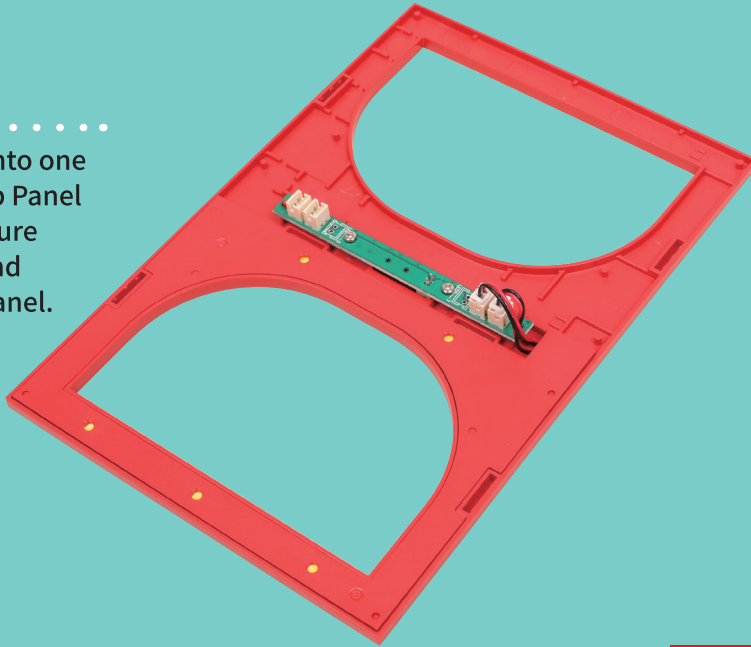

In this issue

In this issue

### LEDs

We will fit the LEDs onto one side of the Ceiling Top Panel of the 【Surfboard/Figure Skating】 scene box and assemble the Inner Panel.

### Figurine

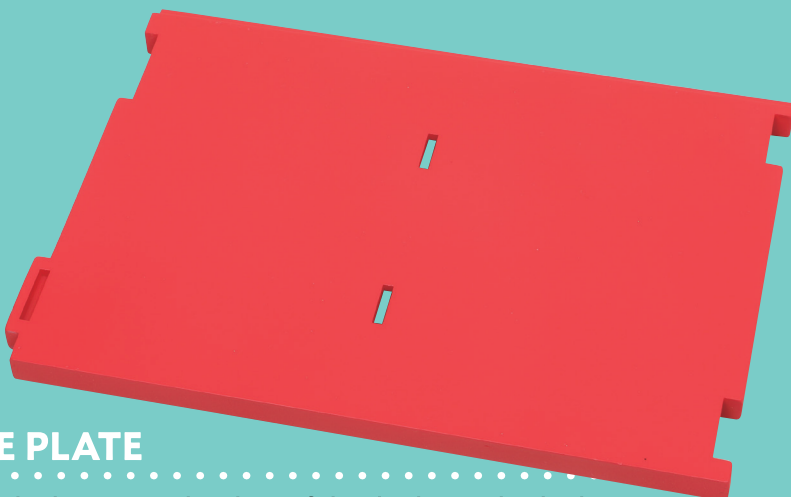

Woodstock

Figurine for the  
【Shovelling Snow】 scene

### BASE PLATE

This is the bottom right plate of the doghouse body that holds each scene box. We will check its shape, orientation, etc.

ASSEMBLY INSTRUCTIONS

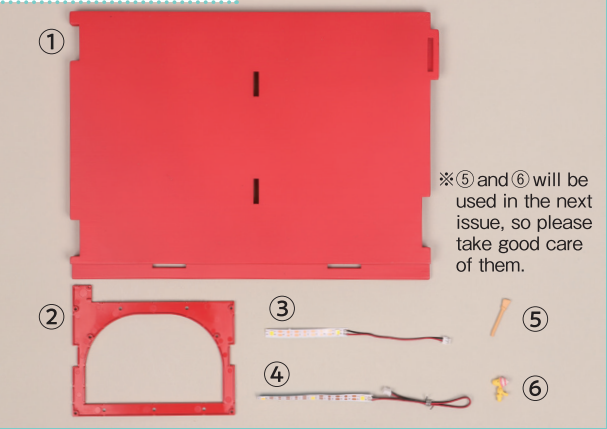

【Summer/Winter, Surfboard/Figure Skating】

Fitting the LEDs  
【Doghouse】  
Checking the Base Plate

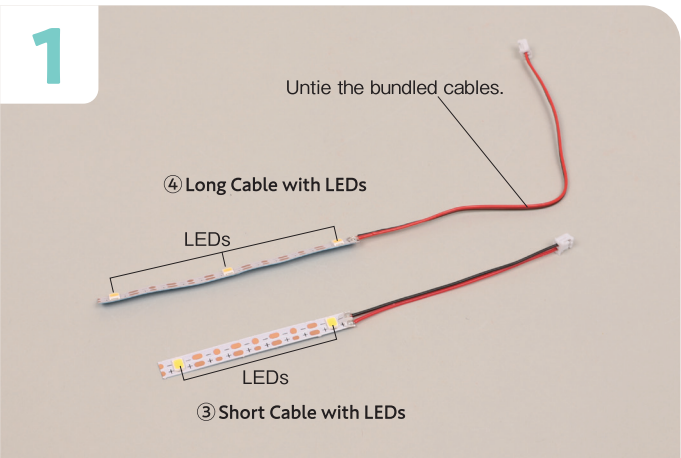

We will fit the LEDs onto one side of the Ceiling Top Panel of the 【Surfboard/Figure Skating】 scene box and check the shape, orientation, etc. of the doghouse's bottom right plate.

- ① Right Base Plate   ② Inner Panel   ③ Short Cable with LEDs   ④ Long Cable with LEDs   ⑤ Broom  
【Figurine】   ⑥ Woodstock

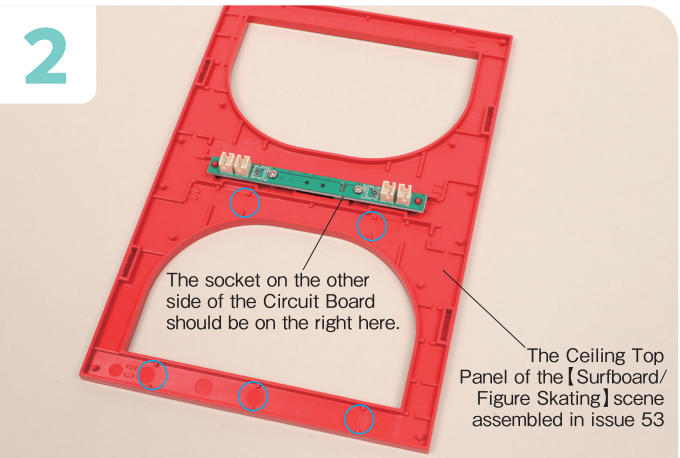

Parts of issue 54

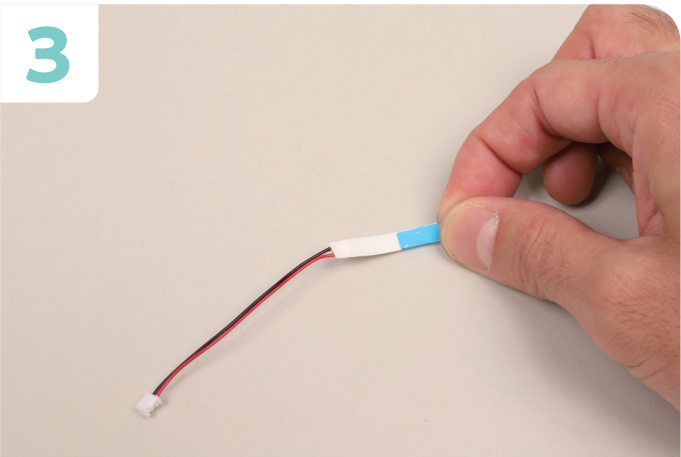

FITTING THE LEDs

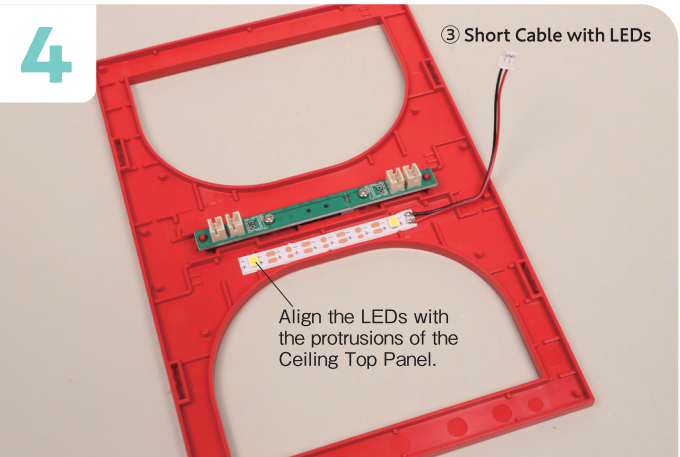

There are LEDs in two places on the ③ Short Cable with LEDs and in three places on the ④ Long Cable with LEDs.

Get ready the Ceiling Top Panel of the 【Surfboard/Figure Skating】 scene assembled in issue 53 and identify the protrusions circled in blue. We will align the LEDs with these protrusions and affix the Cables with LEDs.

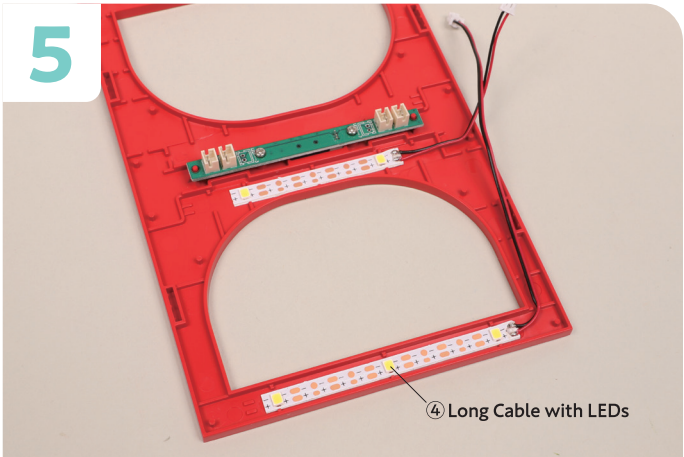

Peel off the film from the sticker side as shown and affix the ③ Short Cable with LEDs and ④ Long Cable with LEDs.

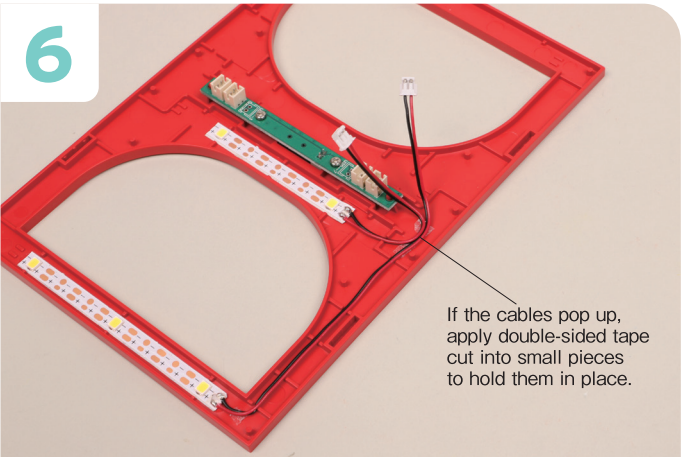

Affix the ③ Short Cable with LEDs in line with the indentation in the Ceiling Top Panel, with its LEDs aligned with the protrusions identified in step 2.

Fitting the LEDs

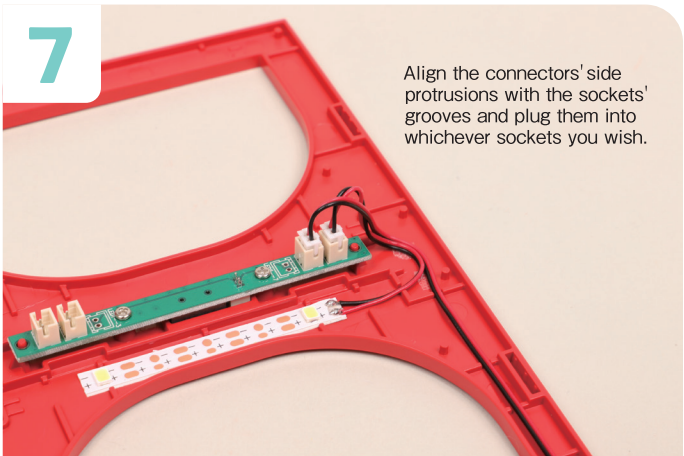

Affix the ④ Long Cable with LEDs in line with the indentation in the Ceiling Top Panel in the same manner.

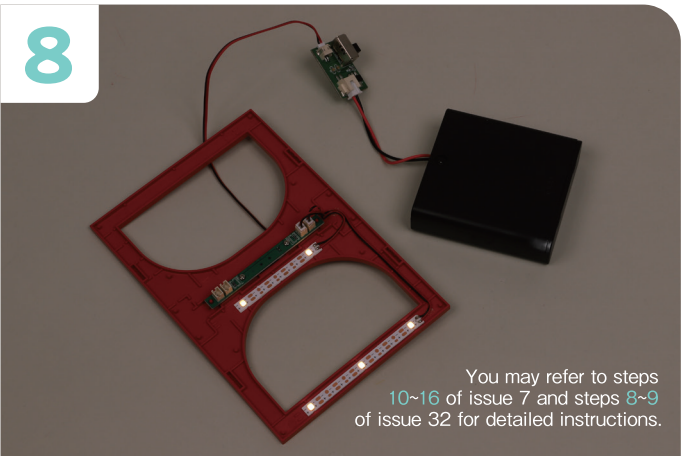

【Summer/Winter, Surfboard/Figure Skating】

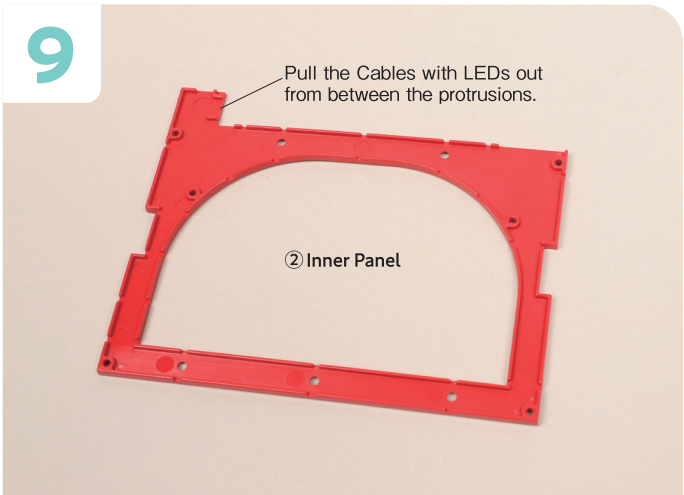

Lead the cables along the grooves as shown. If the cables pop up, apply double-sided tape cut into small pieces to hold them in place.

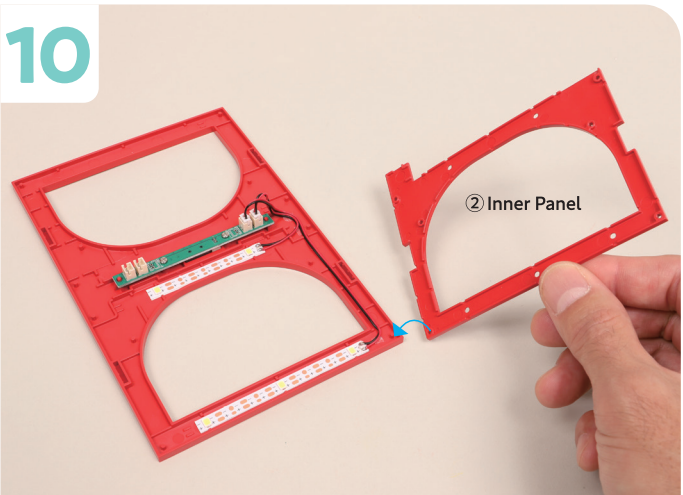

Plug the connectors of the Cables with LEDs into the sockets on the Circuit Board.

Plug the Connection Cable's connector into the socket on the other side of the Ceiling Top Panel, connect it to the Battery Box and check if the LEDs light up properly.

Check the ② Inner Panel. Pull the Cables with LEDs out from the area indicated above.

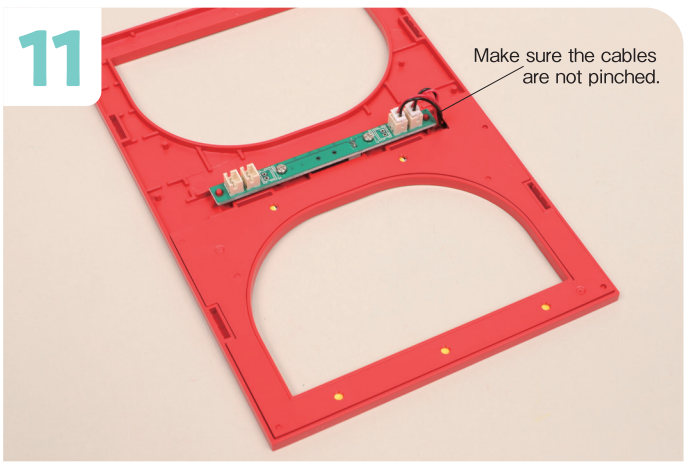

Disconnect the Battery Box and other parts connected to the Ceiling Top Panel and assemble the ② Inner Panel.

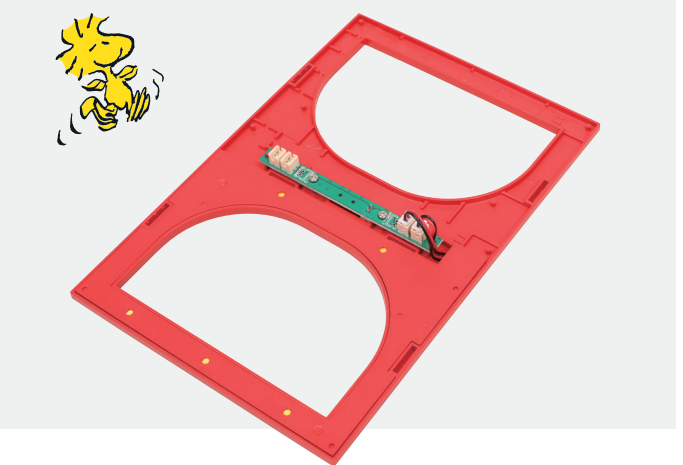

Fitting the LEDs

11

Pull the Cables with LEDs out from the position identified in step 9, taking care not to pinch them.

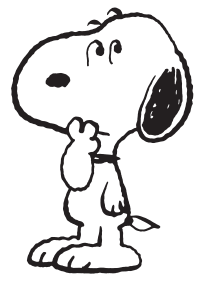

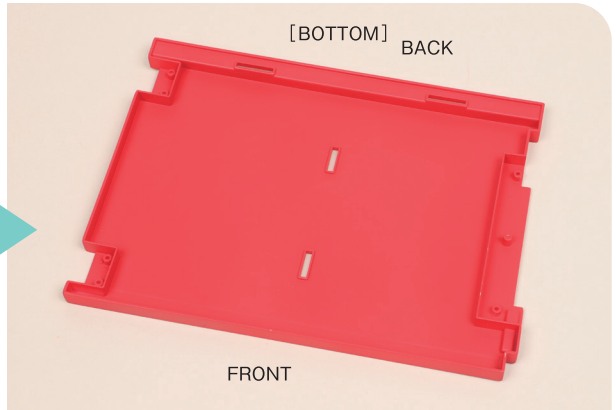

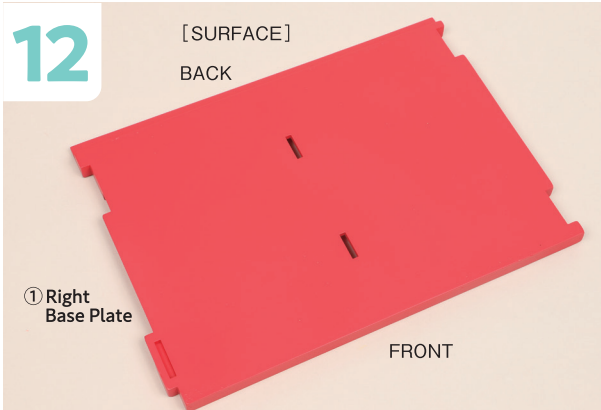

Issue 54 Completed

The LEDs have now been fitted onto the 【Figure Skating】 side of the Ceiling. We will fit more LEDs on the opposite side in a later issue.

CHECKING THE BASE PLATE

12

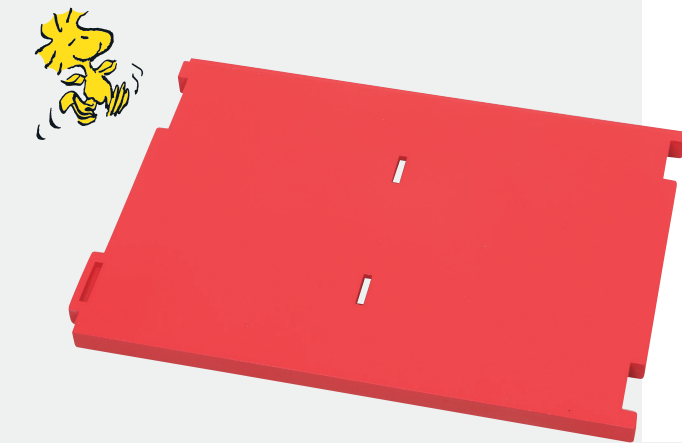

The ① Right Base Plate is the bottom right plate of the doghouse body. The side with recessed edges is the bottom.

13

The Base Plate of the doghouse is made up of two plates. To distinguish between the left and right sides, affix masking tape with the issue number written on it as shown, then keep it in a safe place.

Issue 54 Completed

The ① Right Base Plate will be assembled in the next issue, please keep it safe and scratch-free.

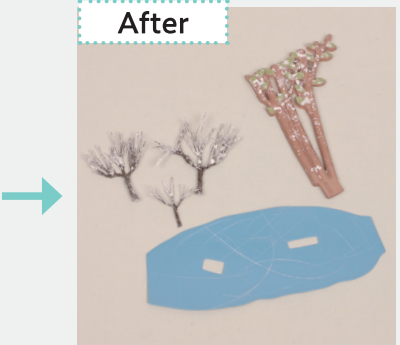

For those who wish to add extra details to the Trees and Lake Surface

Modellers who wish to can use baby powder to simulate snow on the Trees, and add skate marks to the Lake Surface in the 【Figure Skating】 scene.

Before

After

1

Here we will use “matte medium” as an adhesive. First, pour out an appropriate amount of matte medium onto a palette or the like.

2

Without dissolving the matte medium in water, apply a little of it to the Tree branches with a liner brush.

3

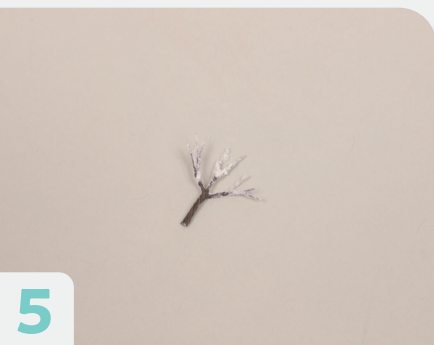

Before the matte medium dries, take some baby powder with your fingertips and evenly sprinkle a little at a time.

4

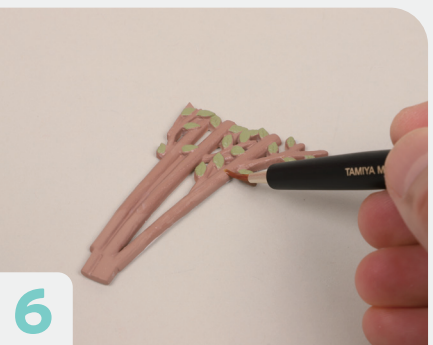

Lightly shake off any excess baby powder to adjust the amount.

5

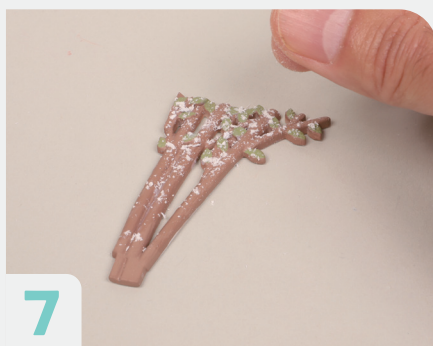

Sprinkle baby powder onto the remaining two withered Trees in the same manner.

6

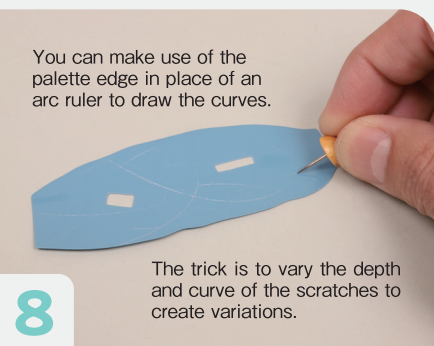

Give these Trees a snow-covered look as well. First, apply a coat of matte medium.

7

Take baby powder with your fingertips and evenly sprinkle a little at a time, with a lesser amount on the trunks.

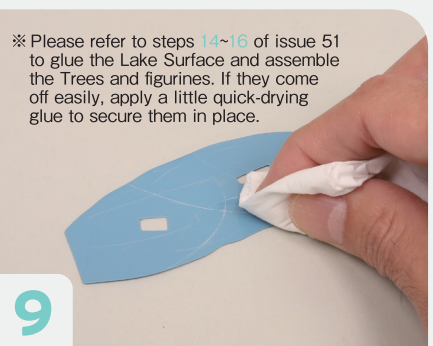

8

You can make use of the palette edge in place of an arc ruler to draw the curves.

The trick is to vary the depth and curve of the scratches to create variations.

9

※ Please refer to steps 14-16 of issue 51 to glue the Lake Surface and assemble the Trees and figurines. If they come off easily, apply a little quick-drying glue to secure them in place.

Sprinkle a little baby powder and wipe with tissue paper to make the scratches more visible and realistic.
