

In this issue

【Spring/Fall, Mother's Day/Kite-flying】

Ceiling, LEDs

【Figurine】

Snoopy

The parts in this issue are the Ceiling and LEDs for the 【Mother's Day/Kite-flying】 scene box – the LEDs will be fitted on one side of the Ceiling. And the figurine is Snoopy for the 【Fan Favorites, Piano】 scene.

CEILING, LEDs

We will assemble the Ceiling of the 【Mother's Day/Kite-flying】 scene by assembling the Circuit Board to the Ceiling and fitting the LEDs on one side of it.

Figurine

Snoopy

Figurine for the 【Piano】 scene

ASSEMBLY INSTRUCTIONS

【Spring/Fall, Mother's Day/Kite-flying】

Assembling the Ceiling Fitting the LEDs

We will assemble the Ceiling of the 【Mother's Day/Kite-flying】 scene by assembling the Circuit Board to the Ceiling, fitting the LEDs on one side of it and then assembling the Inner Panel.

- ① Ceiling ② Inner Panel ③ Long Cable with LEDs ④ Short Cable with LEDs ⑤ Circuit Board
⑥ Screw (PM2×4mm)×3 (1 for spare) 【Figurine】 ⑦ Figurine

Parts of issue 65

【Spring/Fall, Mother's Day/Kite-flying】

Assembling the Ceiling

5

Affix masking tape or the like with the scene name written on it as shown.

Issue 65 Completed

That finishes the Ceiling for the 【Mother's Day/Kite-flying】 scene. Let's go on to fit the LEDs on one side of it.

ASSEMBLING THE CEILING

1

Check the orientation of the ① Ceiling – the holes on either side of the rectangular opening in the middle are positioned differently. The hole on the right is closer to the opening.

2

Assemble the ⑤ Circuit Board to the Ceiling by fitting its terminal part into the opening in the Ceiling.

3

Fit the Ceiling's protrusions into the holes on the left and right ends of the Circuit Board to assemble it.

4

Tighten the ⑥ Screws (PM2×4mm) into the two holes in the Circuit Board as shown.

FITTING THE LEDS

6

There are LEDs in three places on the ③ Long Cable with LEDs and in two places on the ④ Short Cable with LEDs.

7

Identify the protrusions circled in blue on the ① Ceiling. We are going to align the LEDs with these protrusions and affix the Cables with LEDs.

8

Peel off the film from the sticker side of the Cable with LEDs as shown before we affix it.

9

Now affix the ④ Short Cable with LEDs in line with the indentation in the Ceiling at the position shown, with its LEDs aligned with the protrusions identified in step 7.

Fitting the LEDs

Affix the ③ Long Cable with LEDs in line with the indentation in the Ceiling at the position shown in the same manner.

Lead the cables along the grooves as shown. If the cables pop up, cut and apply a small piece of double-sided tape to hold them in place.

Fitting the LEDs

Insert the Ceiling's protrusions all the way into the holes in the Inner Panel. Check that the Inner Panel does not pop up and that the Cables are pulled out from between the protrusions identified in step 14.

Issue 65 Completed

The LEDs have now been fitted onto the 【Mother's Day】 side of the Ceiling. We will fit more LEDs on the opposite side in a later issue.

Plug the connectors of the Cables with LEDs into the sockets on the Circuit Board.

Plug the Connection Cable's connector into the socket on the other side of the Ceiling, connect it to the Battery Box and check that the LEDs light up properly.

Check the ② Inner Panel. Pull the Cables with LEDs out from the area indicated above.

Disconnect the Battery Box and other parts connected to the Ceiling and assemble the ② Inner Panel.

Temporarily assemble the Ceiling to store it

We now have more scene boxes with scenes on both sides completed and Exterior Walls fixed in place. Let's temporarily fit the half-assembled Ceilings to the scene boxes as storage.

Starting with the 【Mother's Day/Kite-flying】 scene, each scene box has three protrusions at the top edge of each of its Exterior Wall.

When assembling the Ceiling on top of the scene box, tuck the Cables with LEDs between the Back Walls while inserting the Exterior Walls' protrusions identified in step 1 into the Ceiling's holes.

Temporarily secure it in place with masking tape.

Temporarily assemble the Ceilings to the other scene boxes with Exterior Walls assembled like the 【Brick Wall/Snowmen】 scene to store them.
