Insert one end of the ⑨ Pin into the hole in the ⑩ Snoopy figurine.

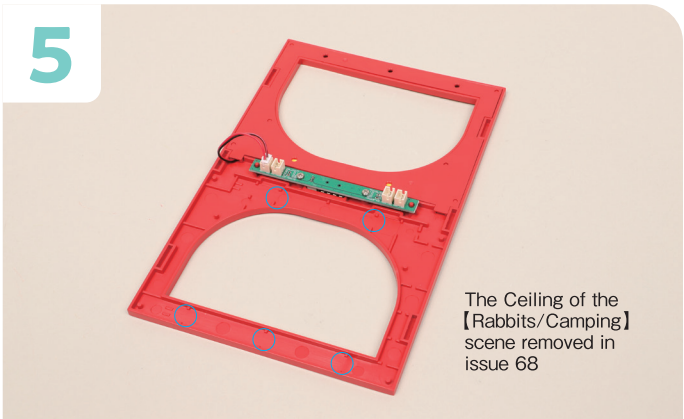

Insert the other end of the Pin into the hole in the Ground.

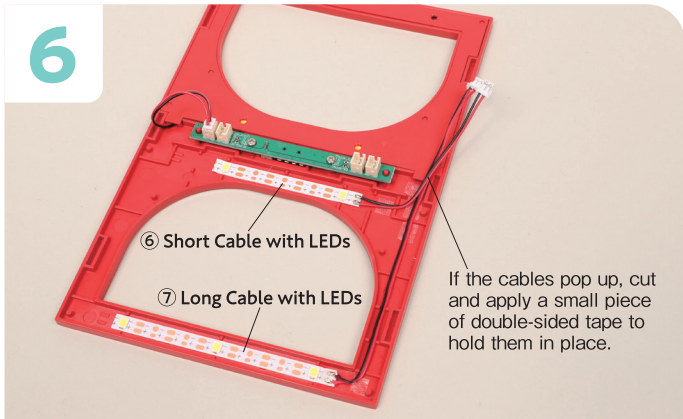

Rotate to adjust the direction of the Pin so that it matches the shapes of the protrusion and the hole, and insert it fully to the back of the hole.

ASSEMBLING THE LEDs

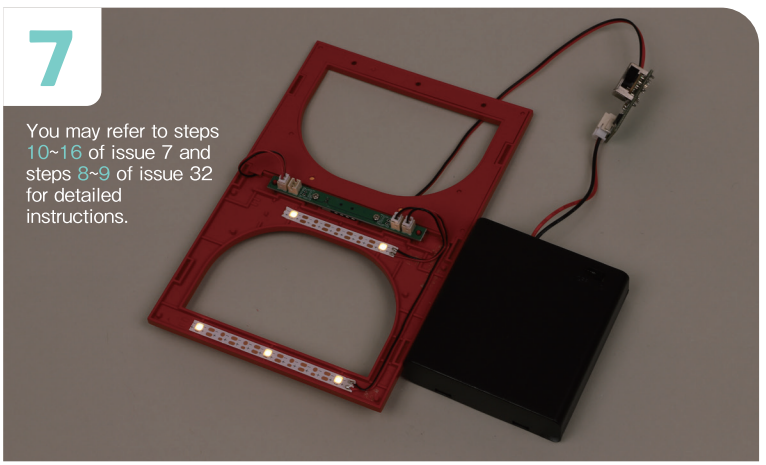

Get ready the Ceiling of the 【Rabbits/Camping】 scene removed in issue 68, and identify the protrusions circled in blue. We are going to align the LEDs with these protrusions and affix the Cables with LEDs.

As we did before, align the LEDs with the protrusions identified in step 5, then affix and lead the ⑥ Short Cable with LEDs and ⑦ Long Cable with LEDs as shown.

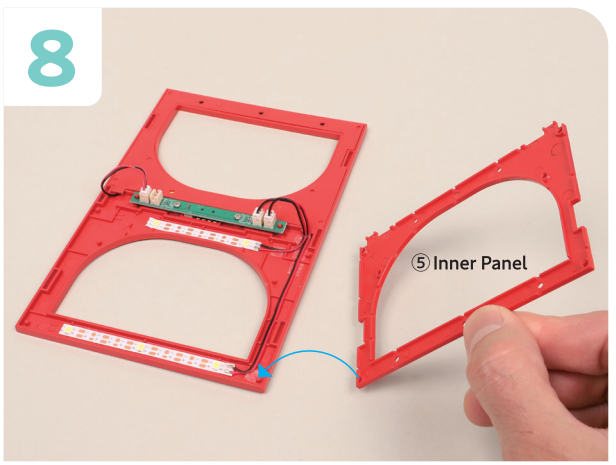

Assembling the LEDs

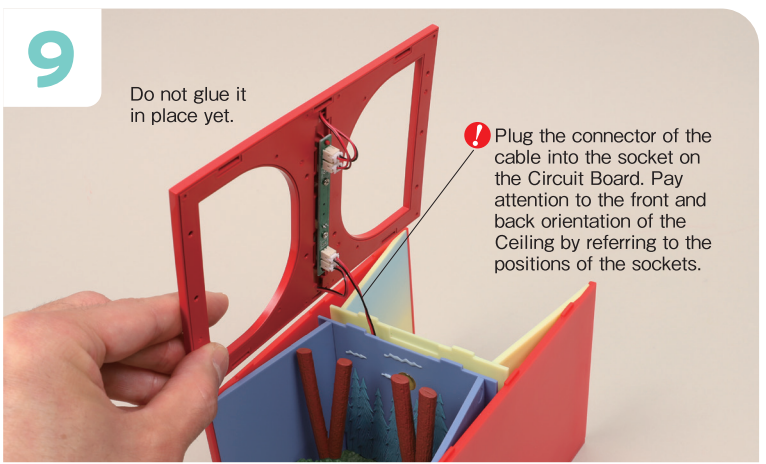

7 You may refer to steps 10~16 of issue 7 and steps 8~9 of issue 32 for detailed instructions.

Plug in the connectors of the Cables with LEDs and that of the Connection Cable, then connect them to the Battery Box and check that the LEDs light up properly as before.

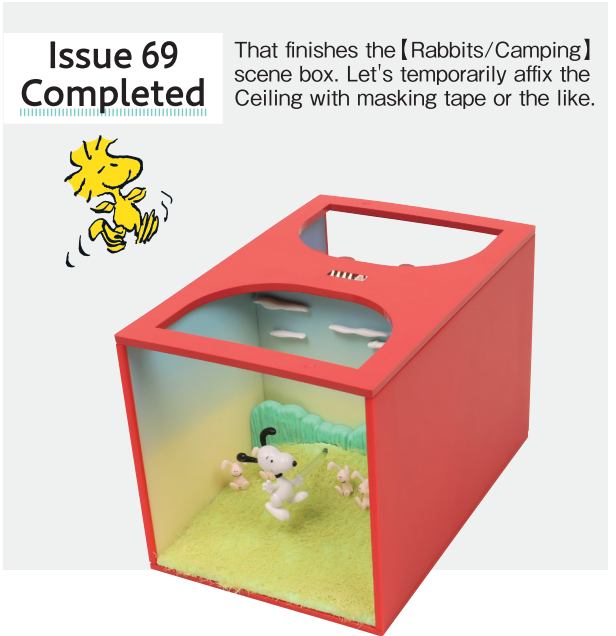

8 Disconnect the Battery Box and other parts connected to the Ceiling and assemble the ⑤ Inner Panel.

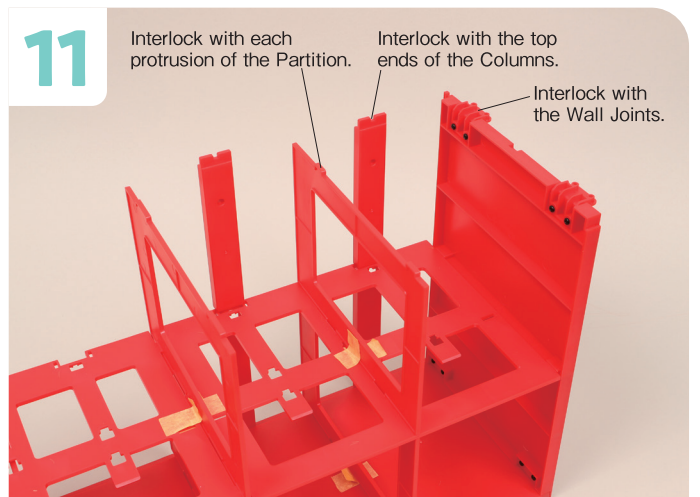

9 Do not glue it in place yet.

Plug the connector of the cable into the socket on the Circuit Board. Pay attention to the front and back orientation of the Ceiling by referring to the positions of the sockets.

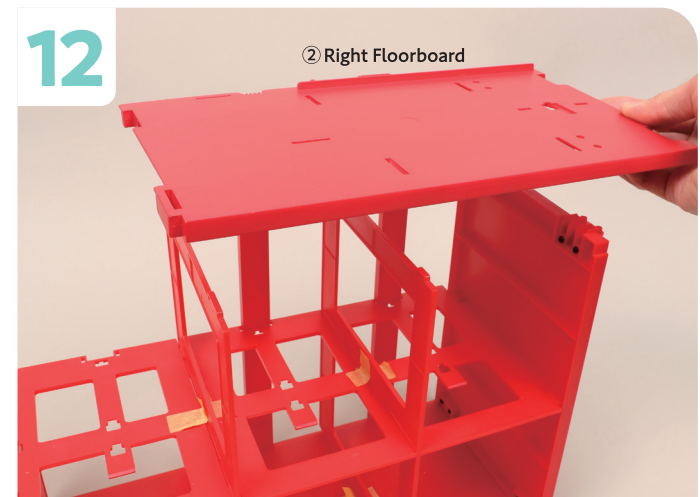

Now assemble the Ceiling onto the scene box. Plug the connector of the cable coming out of the top of the [Camping] scene into the socket on the Circuit Board and assemble them together.
