Side Table Lamp Battery Box

【Figurine】

Snoopy 【Baseball Team】

This week we will assemble the Side Table in the 【Relaxing at Home】 scene. We will also test the lighting of the PEANUTS Logo in the 【Baseball Team】 scene with the Battery Box. The figurine with this issue is Snoopy for the 【Baseball Team】 scene.

In this issue

SIDE TABLE

Assemble the Side Table to be placed on the left of the 【Relaxing at Home】 scene. Fit the Circuit Board inside it and connect it with the Table Lamp to turn on the LED light.

Figurine

Snoopy
Figurine for the
【Baseball Team】 scene

BATTERY BOX

The battery box powers the LEDs when scenes are displayed separately from the doghouse. In this issue we will use it to test the lighting for the PEANUTS logo in the 【Baseball Team】 scene.

Assembling the Side Table

【The PEANUTS Gang, Baseball Team】

Testing the LEDs of the PEANUTS Logo

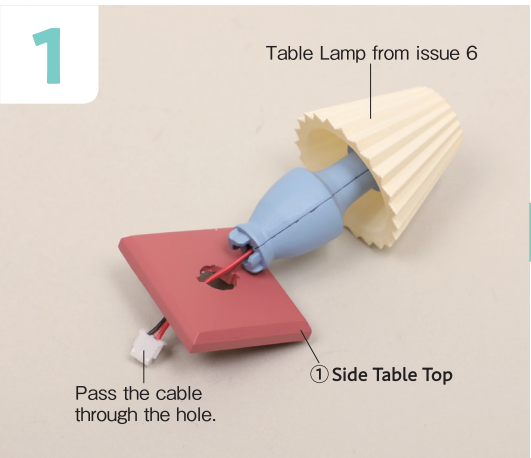

Let's assemble the Side Table in the 【Relaxing at Home】 scene and test the lighting of the PEANUTS Logo in the 【Baseball Team】 scene with the Battery Box.

Parts of issue 7

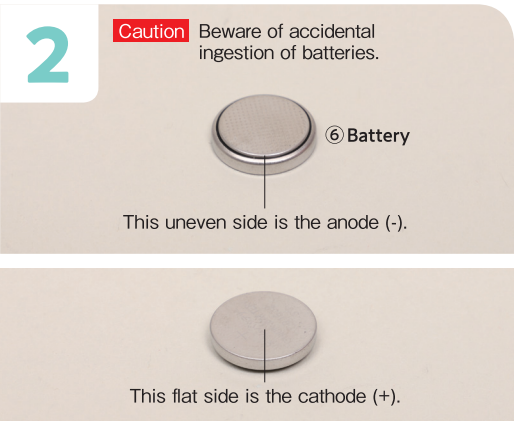

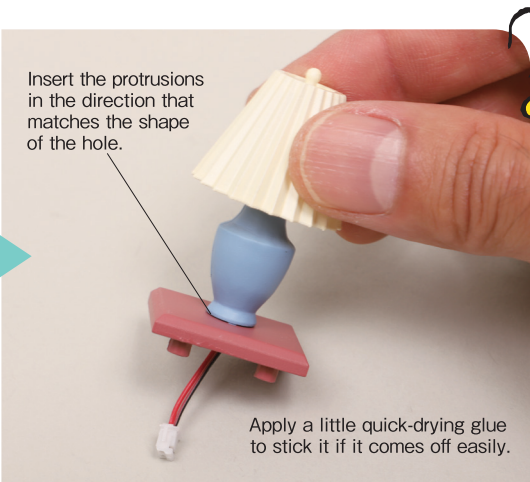

- ① Side Table Top ② Side Table Body ③ Table Leg × 4 ④ Battery Box Circuit Board
⑤ Battery Box ⑥ Battery 【Figurine】 ⑦ Snoopy

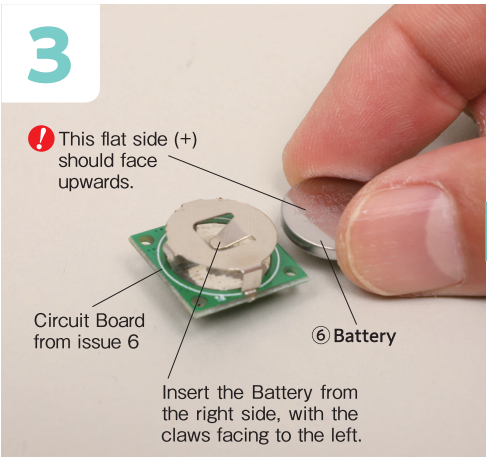

ASSEMBLING THE SIDE TABLE

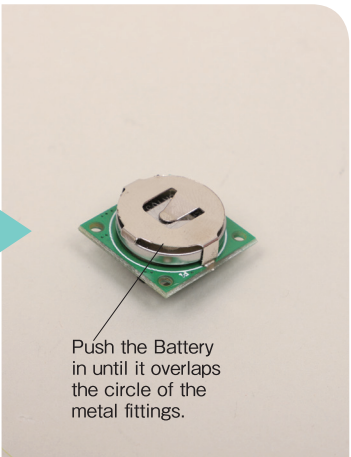

Get ready the Table Lamp assembled in issue 6 and assemble it with the ① Side Table Top. Pass the cable from the bottom of the Table Lamp through the hole, then insert and press the protrusions under the Table Lamp deep into the hole of the Side Table Top.

Check the ⑥ Battery - it should be the "CR1632" type with the uneven side as the anode (-) and the flat side as the cathode (+).

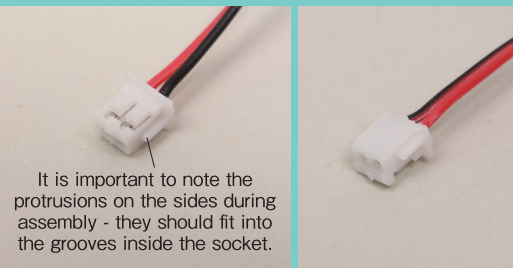

Insert the ⑥ Battery into the Circuit Board from issue 6 by slotting it into the metal fittings. Make sure the Battery is facing the correct side.

Assembling the Side Table

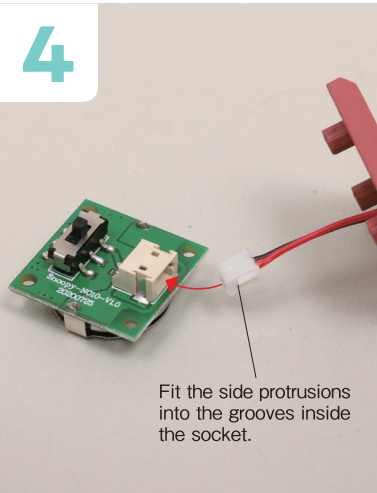

Pay attention to the assembly direction of the cable connector

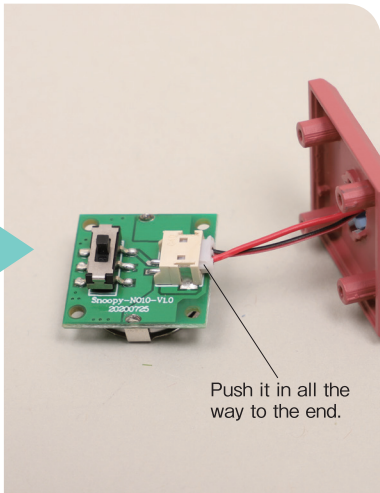

Pay special attention to the assembly direction when connecting the cable connector to the Circuit Board - the shapes of its upper and lower sides are different and assembling the wrong side forcibly could break it.

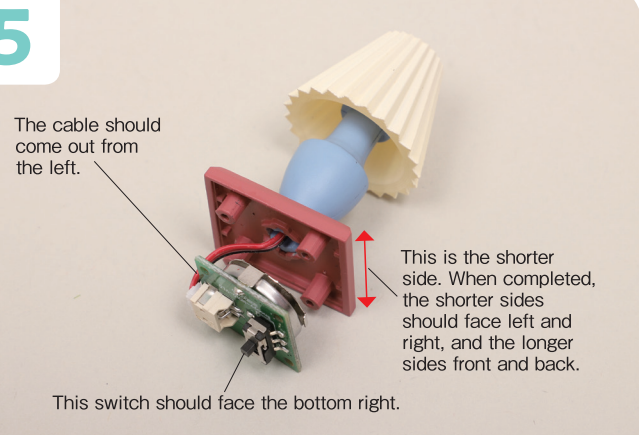

4

Turn the Circuit Board from step 3 over and insert the cable connector from the Table Lamp into the socket. Please pay special attention to the assembly direction of the connector.

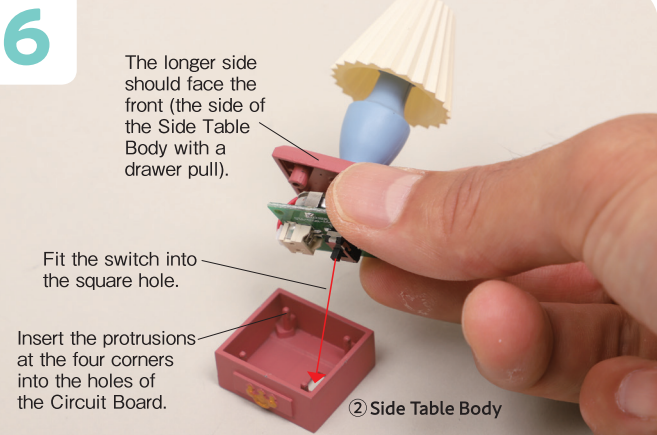

5

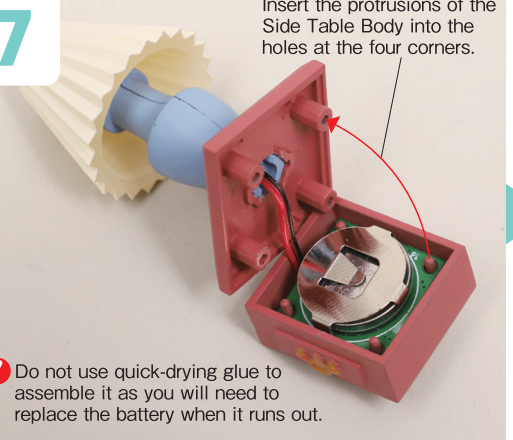

Adjust the directions of the Circuit Board and the Table Lamp, so the cable can come out from the left.

6

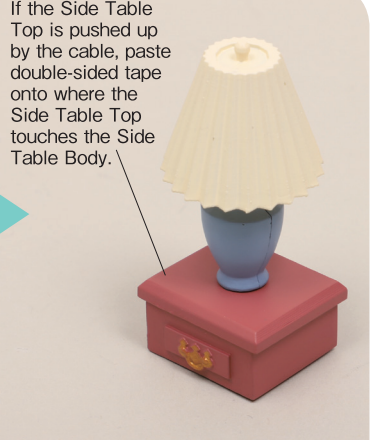

Keep the orientation in step 5 and fit the Circuit Board into the ② Side Table Body. Fit the switch into the square hole of the Side Table Body and insert the protrusions at the four corners into the holes of the Circuit Board.

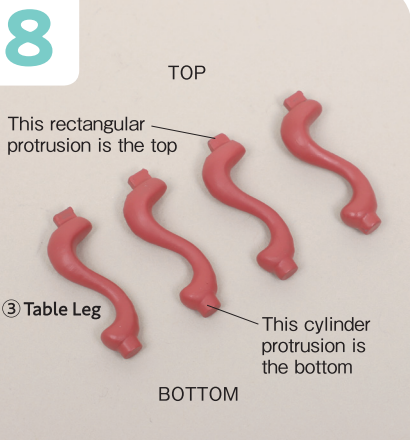

7

Next, we will assemble the Side Table Top with the Side Table Body. Insert the protrusions of the Side Table Body all the way into the holes at the four corners of the Side Table Top.

8

Check the direction of the ③ Table Leg with the rectangular protrusion as the top and the cylinder protrusion as the bottom.

ASSEMBLY INSTRUCTIONS

【The PEANUTS Gang, Baseball Team】

Assembling the Side Table

We will now fit the ③ Table Legs to the bottom of the Side Table Body. Apply a little quick-drying glue to the rectangular protrusions and insert the Table Legs all the way into the holes of the Side Table Body.

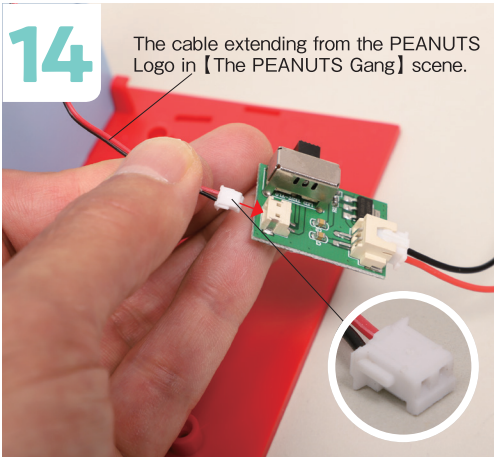

Issue 7 Completed

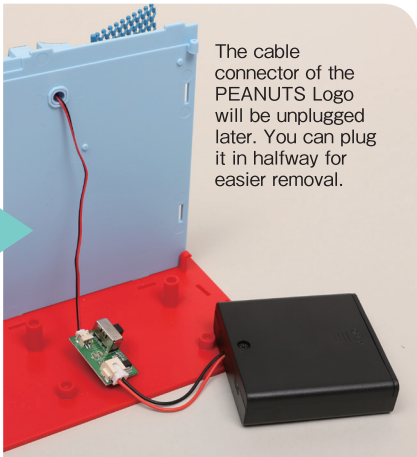

That finishes the Side Table. Turn on the switch under the Side Table Body to light up the LED. This Side Table is placed on the left of the [Relaxing at Home] scene. Turn off the switch if the LED is not in use.

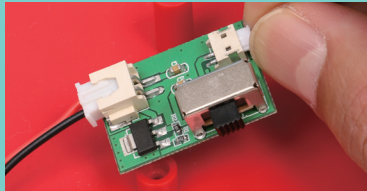

Testing the LEDs of the PEANUTS Logo

Get ready 【The PEANUTS Gang】 scene assembled so far and insert the connector of the cable extending from the PEANUTS Logo into the small socket of the Battery Box Circuit Board.

Be careful when unplugging the connectors

Hold the connector with your fingertips when unplugging it from the socket. If you pull the cable to unplug it, its internal wires may break, and the LEDs may not light up properly.

TESTING THE LEDS OF THE PEANUTS LOGO

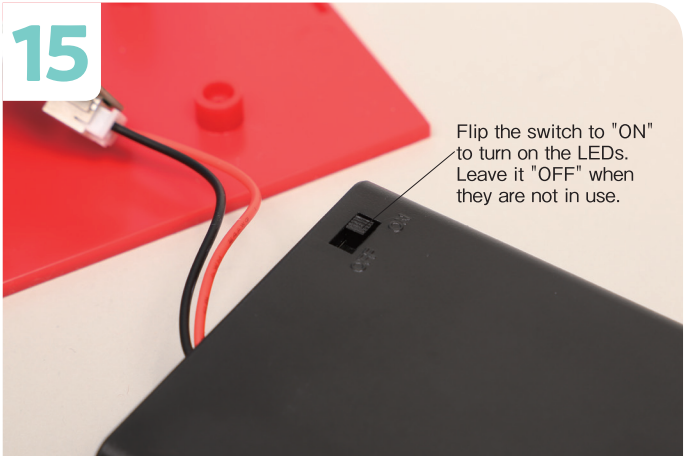

Test the lighting of the PEANUTS Logo in the [Baseball Team] scene with the ⑤ Battery Box. First, unscrew the Battery Box with a screwdriver as shown.

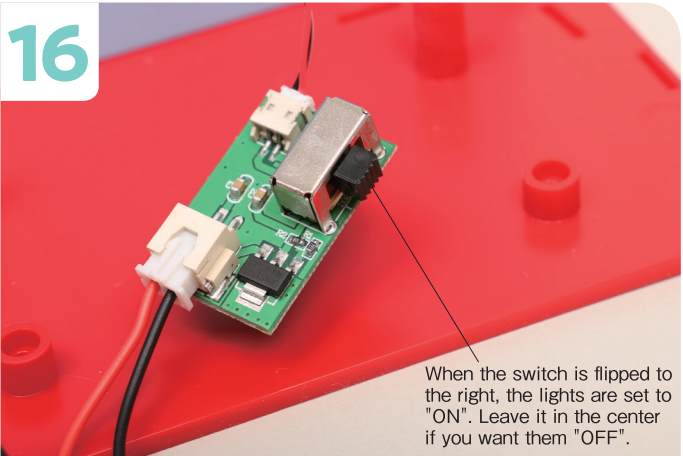

Gently press where it says "OPEN" to slide the Battery Box cover open.

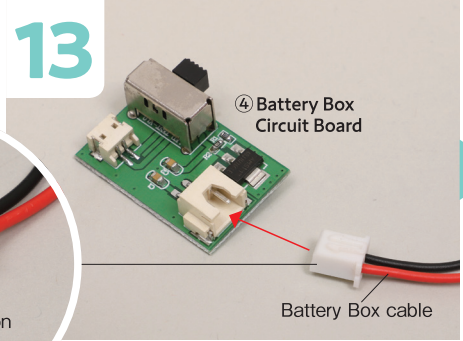

Get ready four AA dry cell batteries, note the + and - positions and insert them into the Battery Box. After inserting the batteries, attach the cover and tighten the screw in the reverse order of taking out the batteries.

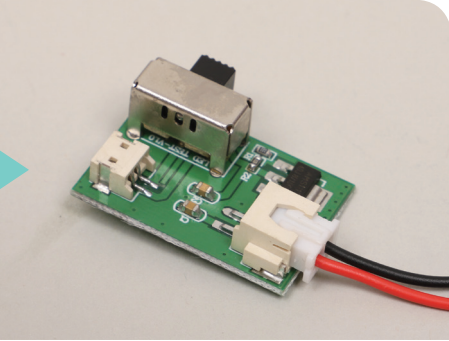

Let's turn on the lights of the PEANUTS Logo. First, flip the switch of the Battery Box to "ON".

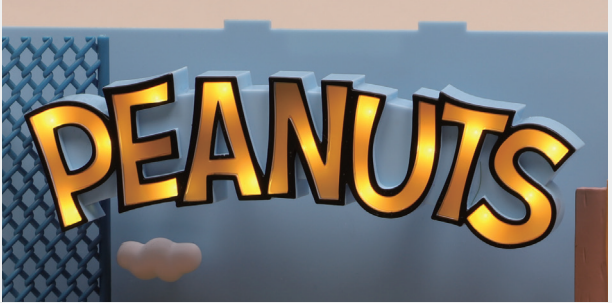

Flip the switch of the ④ Battery Box Circuit Board to "ON" as well.

As in step 4, insert the connector of the cable from the Battery Box into the large socket on the Battery Box Circuit Board. Make sure the connector is facing the right way.

Issue 7 Completed

Check if the lights are properly turned on following the instructions, then turn both the switches of the Circuit Board and the Battery Box to "OFF". Take the batteries out of the Battery Box if you are not going to use the lighting for long.

Let's decorate it with the figurine

Put the ⑦ Snoopy figurine onto the front edge of the Pitcher's Mound in the [Baseball Team] scene to decorate it. Insert the protrusions under the figurine deep into the holes and secure it with quick-drying glue or double-sided tape.
