⑫ 400mm Circuit Board Cable×2 ⑬ Short Cable with LED ⑭ Long Cable with LED 【Figurine】 ⑮ Spike

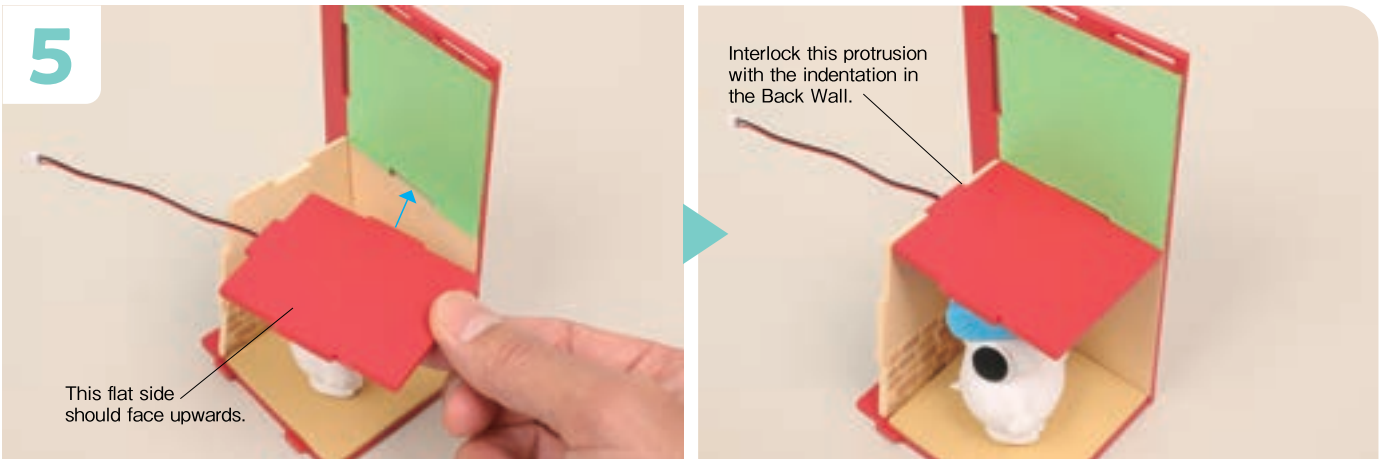

Parts of issue 75

【Figurine Box, Spike】

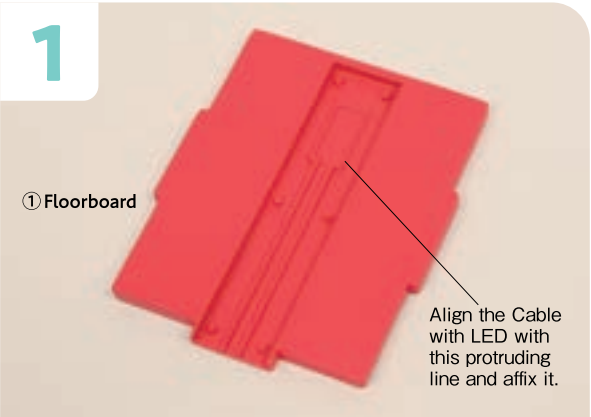

Assembling the Floorboard, Back Wall and Ground

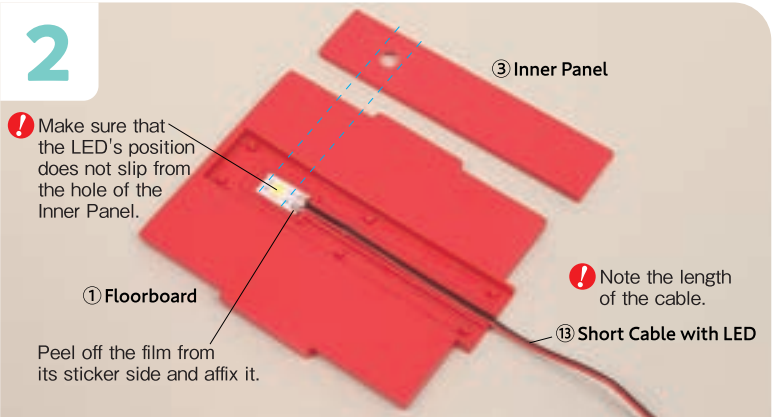

Assemble the Floorboard from step 3 by interlocking its protrusions with the hole in the Right Wall and the indentation in the Back Wall as shown.

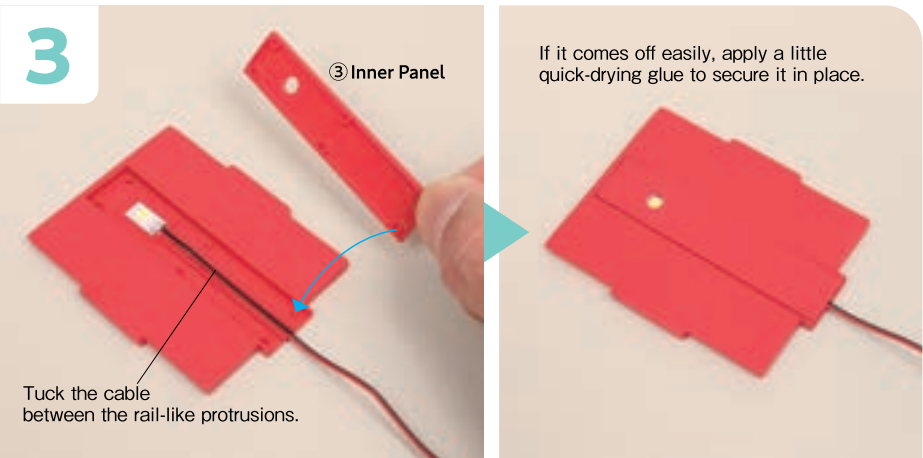

ASSEMBLING THE FLOORBOARD, BACK WALL AND GROUND

Check the ① Floorboard. Align the Cable with LED with the protruding line and affix it.

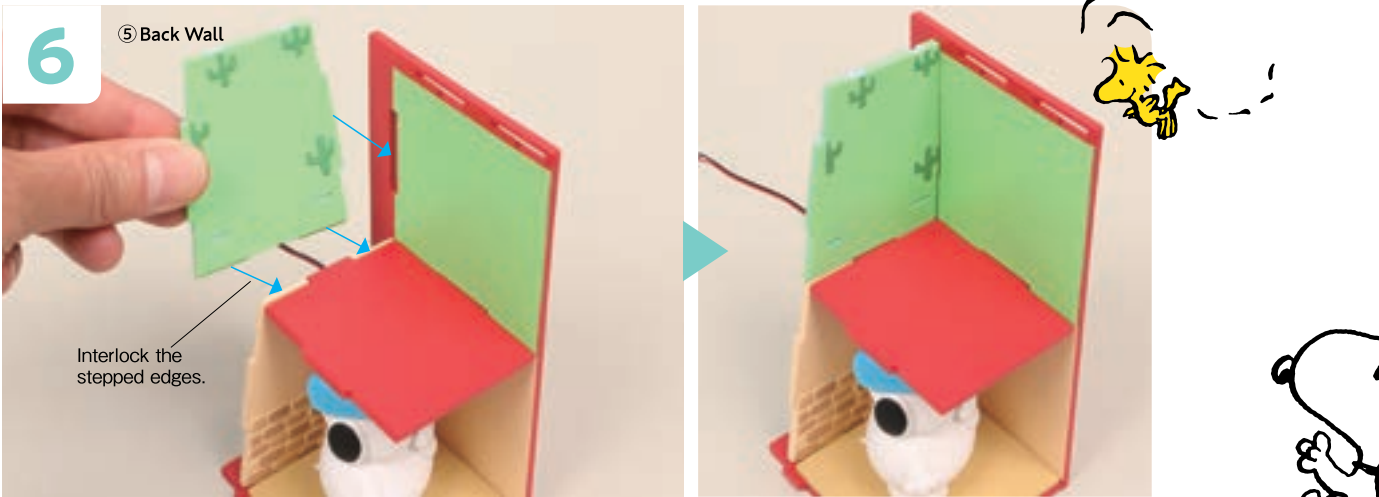

Peel off the film from the sticker side of the ⑬ Short Cable with LED and affix it to the ① Floorboard. Refer to step 3 to ensure that the LED's position does not slip from the hole of the ③ Inner Panel.

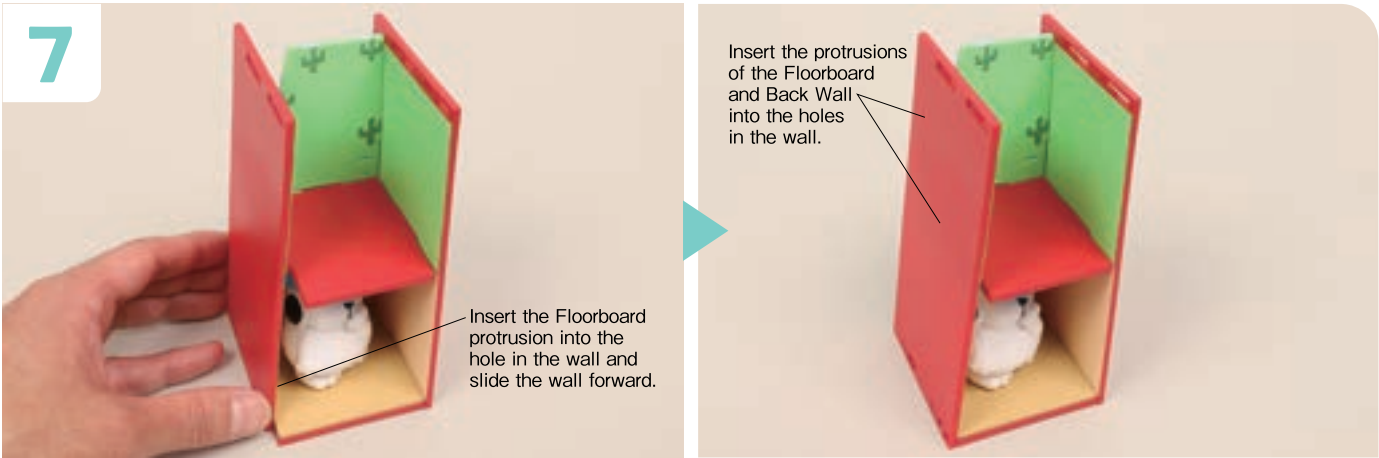

To prevent the cable from sagging, tuck it between the rail-like protrusions of the Floorboard and fit the ③ Inner Panel from above.

Get ready the 【Olaf】 scene assembled in issue 74 and remove the Left Wall.

Assemble the Back Wall on top of the Floorboard by inserting its protrusion on the right into the hole in the Right Wall and interlocking its bottom edge with the bump.

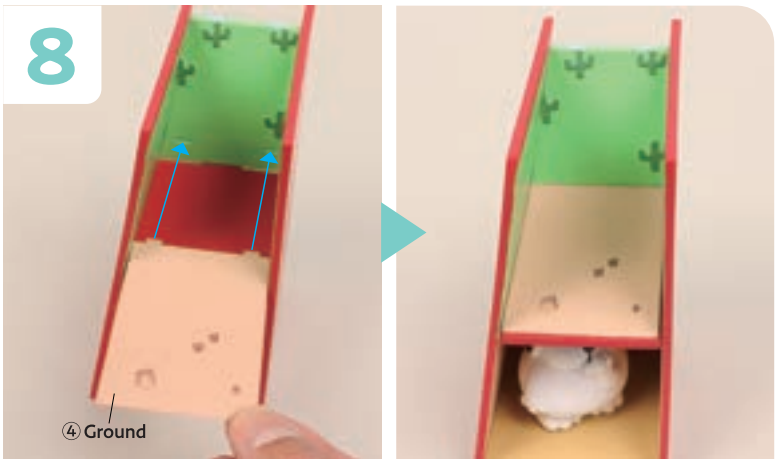

Reassemble the Left Wall removed in step 4.

Assembling the Floorboard, Back Wall and Ground

Apply a little quick-drying glue to the rear protrusions of the ④ Ground and insert them into the holes in the Back Wall.

Issue 75 Completed

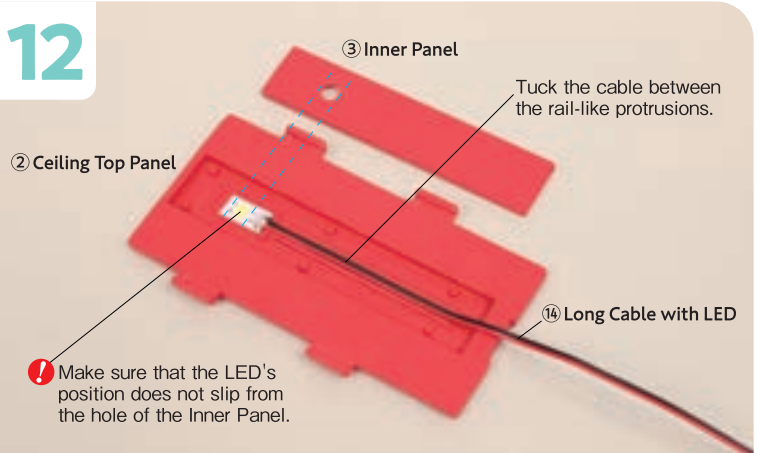

The Floorboard, Back Wall and Ground have now been assembled to the 【Spike】 scene. Let's move on to making the Cacti.

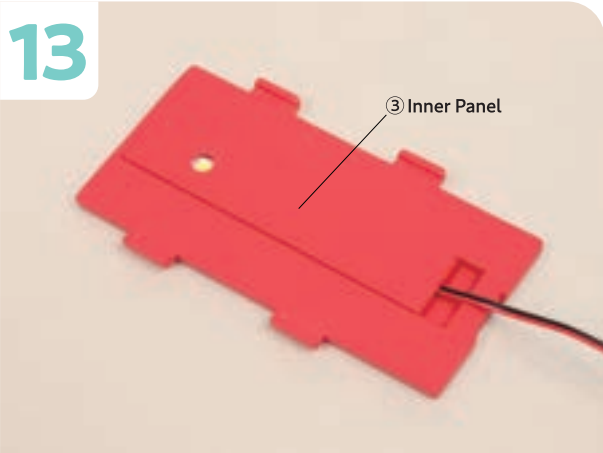

ASSEMBLING THE CEILING

12

Affix the ⑭ Long Cable with LED to the ② Ceiling Top Panel as in step 2, taking care not to let the LED's position slip from the hole of the ③ Inner Panel.

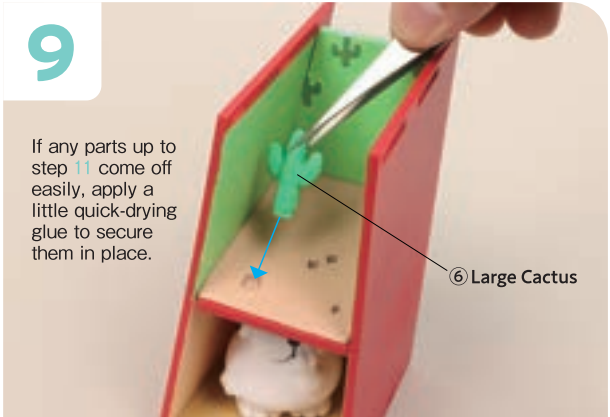

13

Assemble the remaining ③ Inner Panel as in step 3.

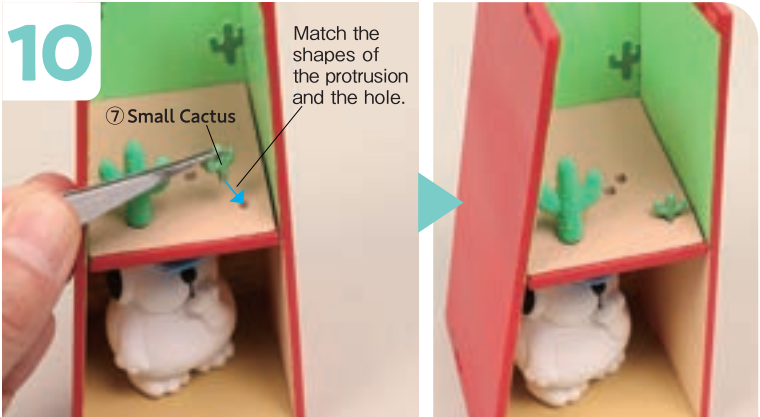

MAKING THE CACTI

9

Insert the ⑥ Large Cactus' bottom protrusion into the hole in the Ground at the position shown by matching the shapes of the protrusion and the hole.

10

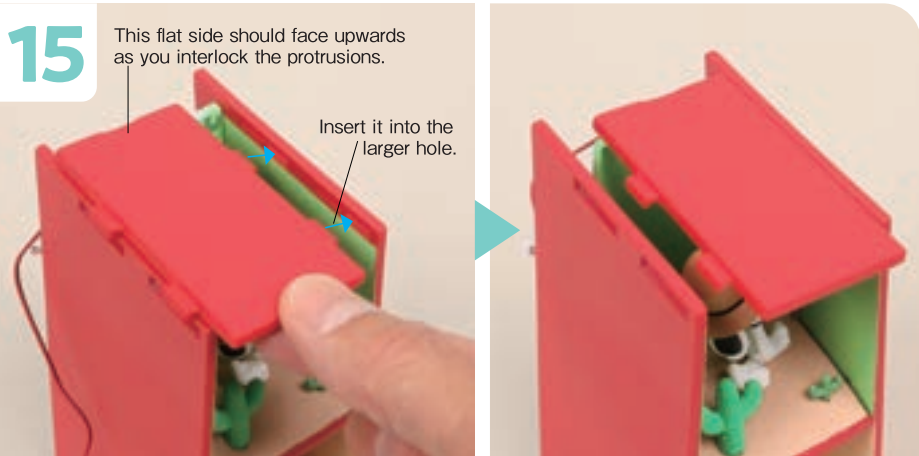

Assemble the ⑦ Small Cactus in the same manner.

14

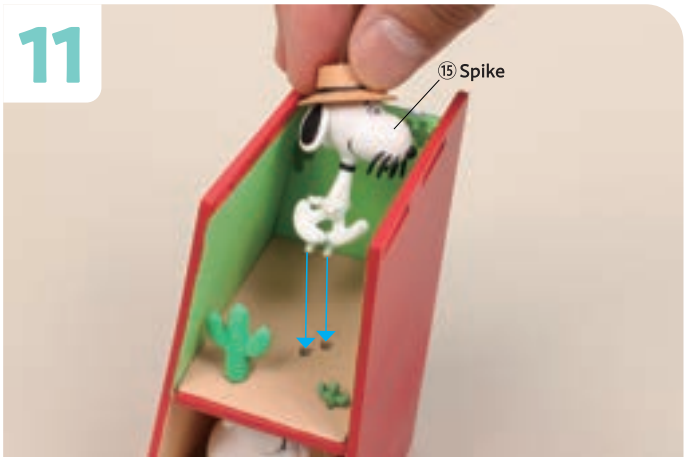

Get ready the 【Figurine Box】 from step 11 and slightly ease the upper part of the Left Wall outwards.

15

Assemble the Ceiling Top Panel from step 13 by first inserting the protrusions on its right into the holes in the Right Wall.

11

Then assemble the ⑮ Spike figurine by inserting the protrusions under its feet into the holes in the Ground.

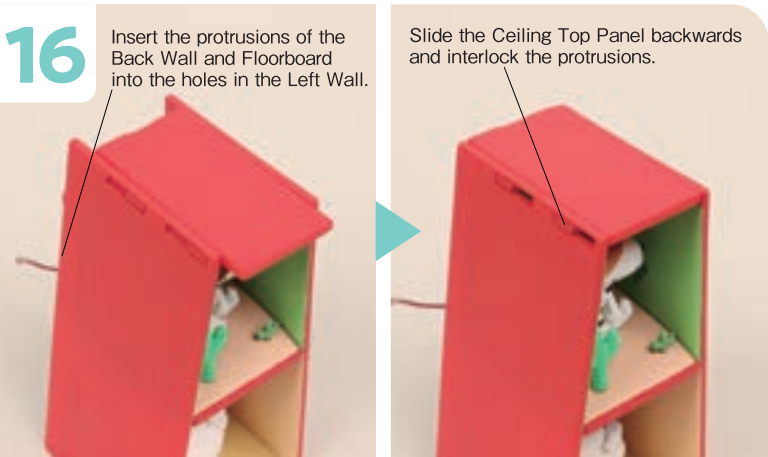

Issue 75 Completed

The 【Spike】 scene is now adorned with small items and a figurine. Now let's assemble the Ceiling Top Panel to complete the scene box.

16

Insert the protrusions on the left side of the Ceiling Top Panel into the holes in the Left Wall in the same manner (see left photo), and slide the panel backwards to assemble it.

Issue 75 Completed

That finishes the lower part of the Figurine Box on the left side of the doghouse.
