Floorboard, Walls, Ground

【Summer/Winter, Sandcastles/Skiing】

Exterior Walls

【Figurine】

Snoopy 【Sandcastles】

In this issue

In this issue

The parts in this issue are the Floorboard, surrounding Walls and Ground for the 【Sandcastles】 scene. Also included are the left and right Exterior Walls, and the figurine is Snoopy for the same scene.

FLOORBOARD, WALLS, GROUND

We will start assembling the 【Sandcastles】 scene by first assembling the surrounding Walls to the Floorboard and fitting the Ground sprinkled with Sand.

Figurine

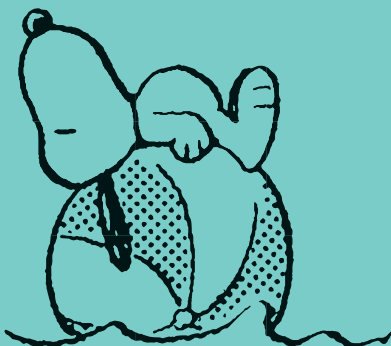

Snoopy

Figurine for the
【Sandcastles】 scene

CIRCUIT BOARD CABLES

We will also affix the Stickers to the Circuit Board Cables previously supplied, affix the cables to the Shelving Boards on the upper side of the doghouse and route them.

※ Actual parts may vary from the photos.

ASSEMBLY INSTRUCTIONS

【Summer, Sandcastles】

Assembling the Floorboard, Walls and Ground

【Summer/Winter, Sandcastles/Skiing】

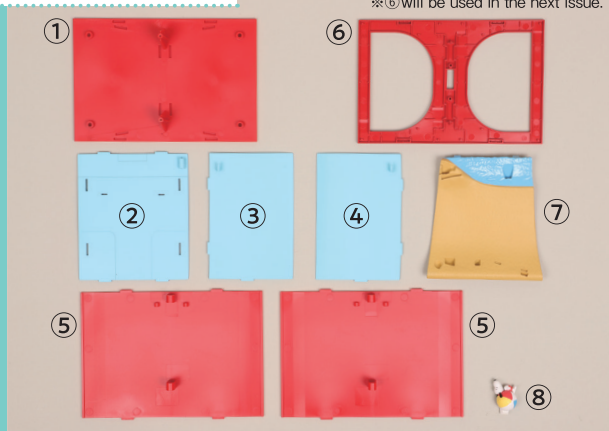

Temporarily assembling the Exterior Walls

【Doghouse】

Affixing the Circuit Board Cables

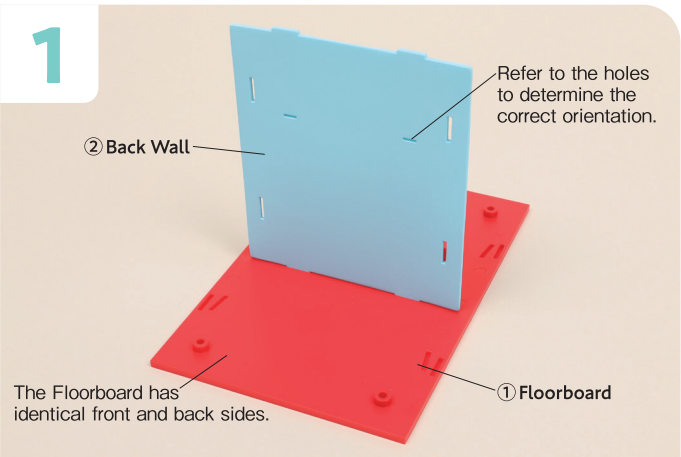

We will start assembling the 【Sandcastles】 scene by first assembling the surrounding Walls to the Floorboard and fitting the Ground sprinkled with Sand. We will also affix the Stickers to the Circuit Board Cables previously supplied and affix the cables to the upper side of the doghouse.

Parts of issue 80

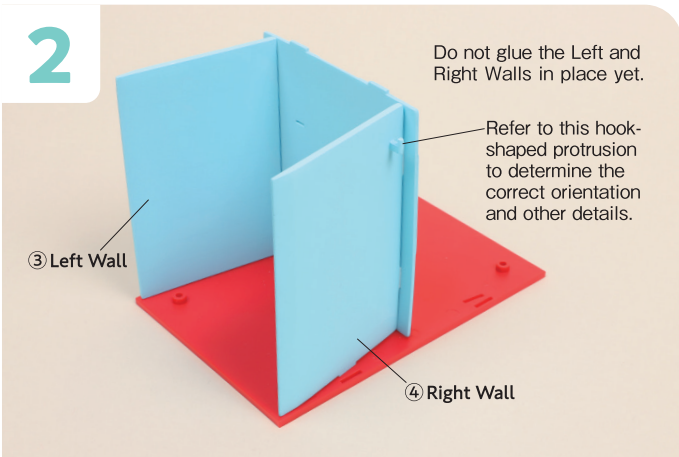

- ① Floorboard ② Back Wall ③ Left Wall ④ Right Wall ⑤ Exterior Wall×2 ⑥ Ceiling Top Panel ⑦ Ground 【Figurine】 ⑧ Snoopy

ASSEMBLING THE FLOORBOARD, WALLS AND GROUND

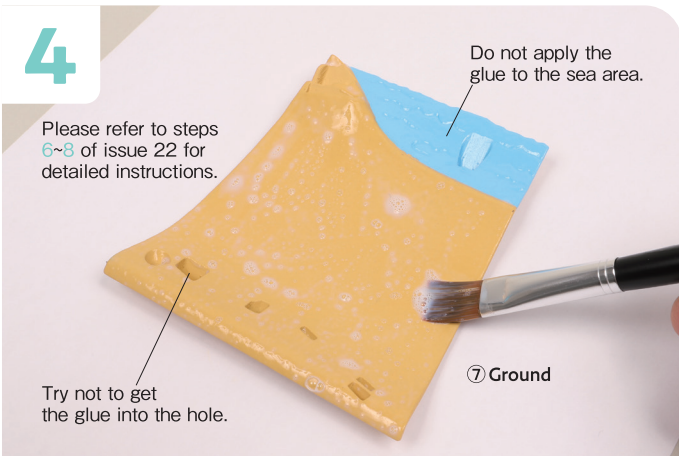

Apply a little quick-drying glue to the grooves of the ① Floorboard and assemble the ② Back Wall as we did before.

Then assemble the ③ Left Wall and ④ Right Wall as before.

Get ready the Sand from issue 22 and sprinkle it on the Ground.

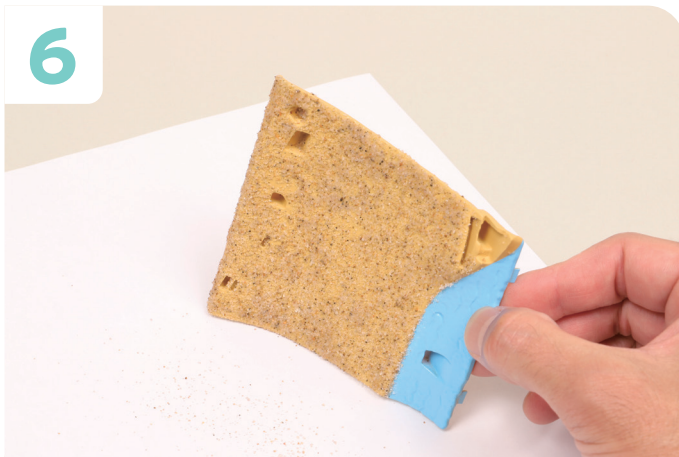

First, add a few drops of neutral detergent to the wood glue mixed with water, and apply it to the beach area of the ⑦ Ground.

Assembling the Floorboard, Walls and Ground

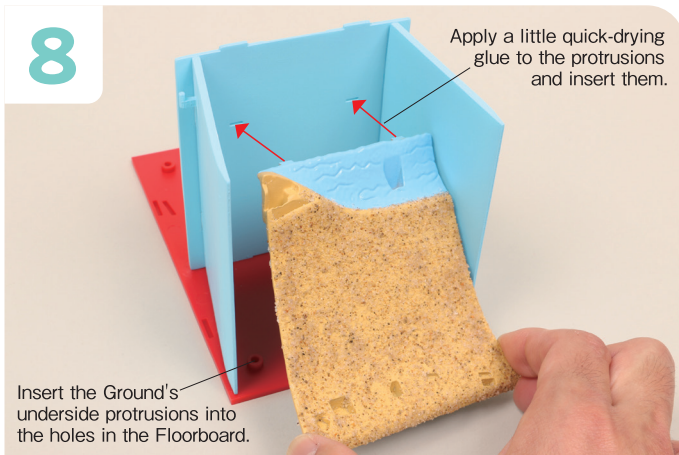

Before the glue dries, sprinkle the Sand on the beach area as evenly as possible.

Once the glue is completely dry, lightly shake off any excess Sand onto an unwanted piece of paper or a similar surface.

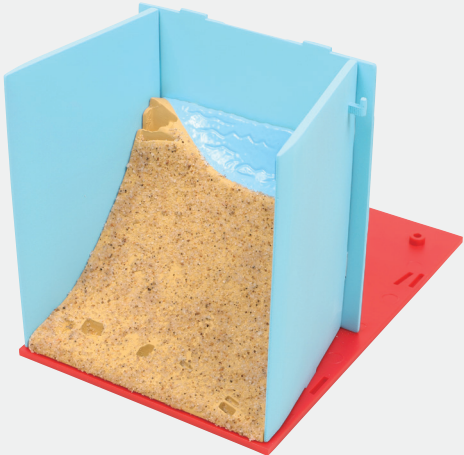

Scrape any Sand from inside the holes in the Ground using the tip of a toothpick or the like.

Apply a little quick-drying glue to the two rear protrusions of the ⑦ Ground and insert them into the holes in the Back Wall. Also insert the underside protrusions at the front into the holes in the Floorboard.

Issue 80 Completed

The surrounding Walls and Ground of the 【Sandcastles】 scene have now been assembled. More parts will be assembled in the next issue.

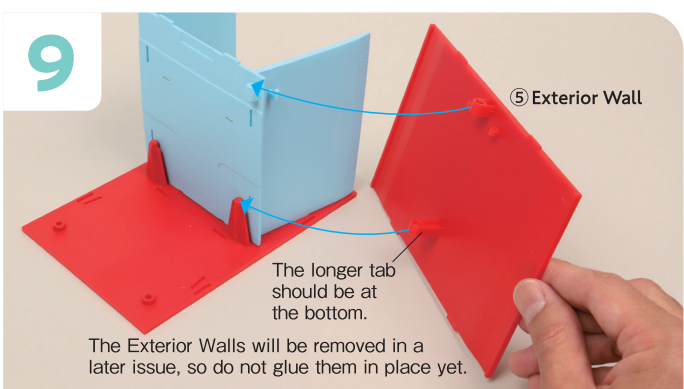

Adding the figurine

Insert the bottom protrusion of the ⑧ Snoopy figurine into the hole in the Ground. Apply quick-drying glue if it falls off easily.

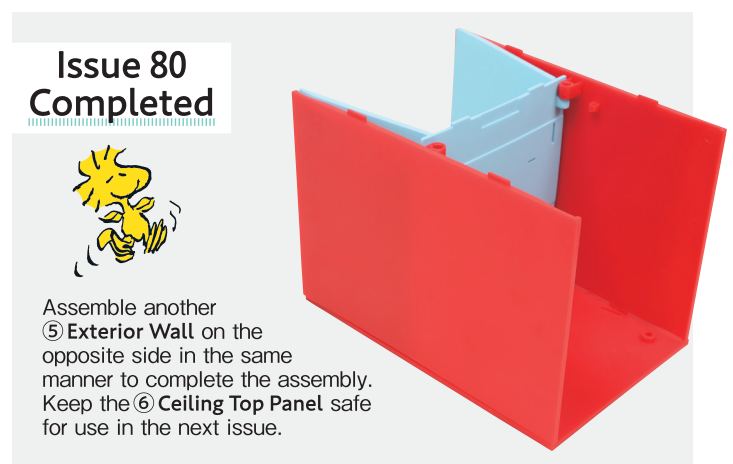

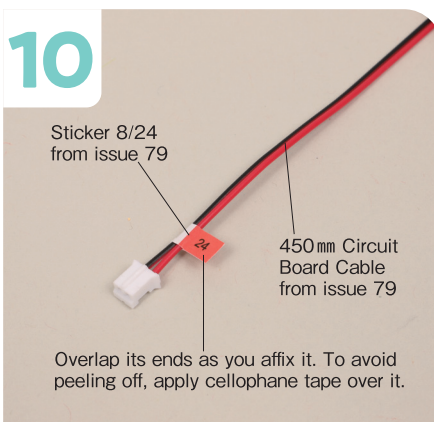

TEMPORARILY ASSEMBLING THE EXTERIOR WALLS

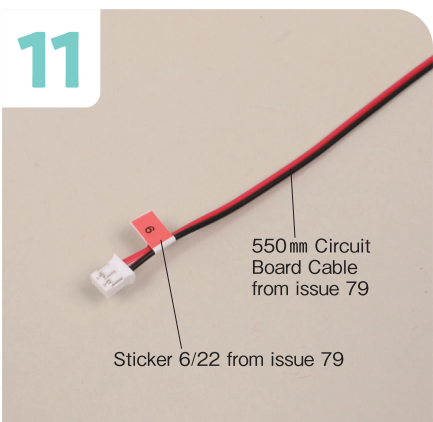

The 5 Exterior Walls will be secured in place in a later issue. For now, we will just temporarily assemble them. First, align the protrusions and tabs and assemble an Exterior Wall on one side.

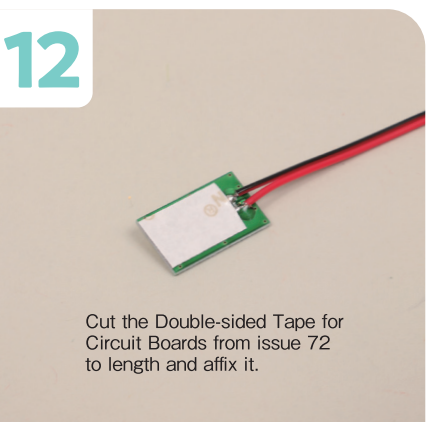

AFFIXING THE CIRCUIT BOARD CABLES

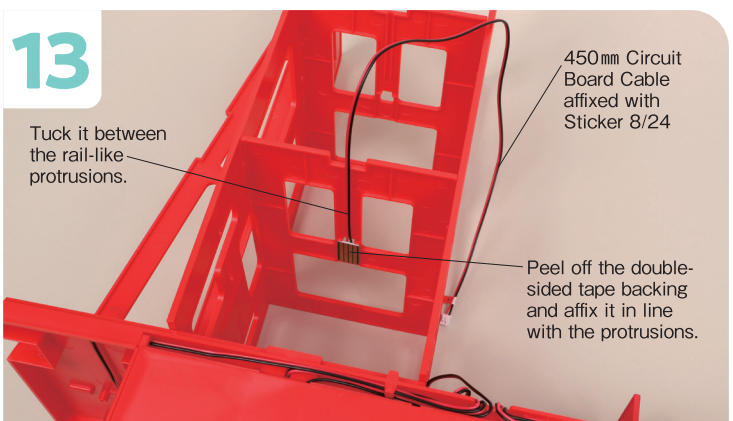

Affix Sticker 8/24 from issue 79 near the connector of the 450mm Circuit Board Cable from issue 79.

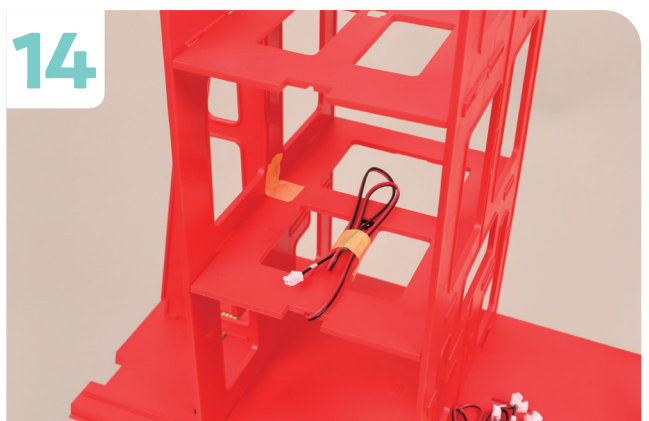

Affix Sticker 6/22 from issue 79 near the connector of the 550mm Circuit Board Cable from issue 79 in the same manner.

Apply the Double-sided Tape for Circuit Boards from issue 72 to the circuit boards of the two Circuit Board Cables at the opposite ends.

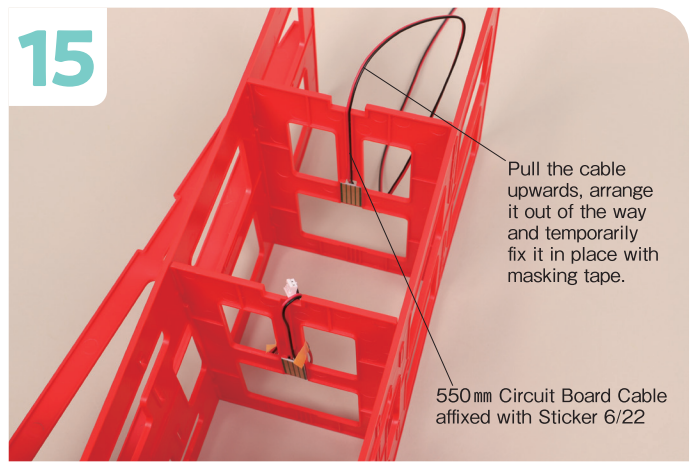

Affix the 450mm Circuit Board Cable affixed with Sticker 8/24 from step 10 to the underside of the Shelving Board on the upper side of the doghouse assembled so far as shown.

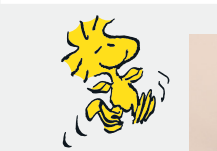

Pull the cable taut and route it to the top of the Shelving Board, then bundle it out of the way and temporarily fix it in place with masking tape.

Affixing the Circuit Board Cables

As in steps 13-14, affix the 550mm Circuit Board Cable affixed with Sticker 6/22 from step 11 to the underside of the Shelving Board in the position shown.

Issue 80 Completed

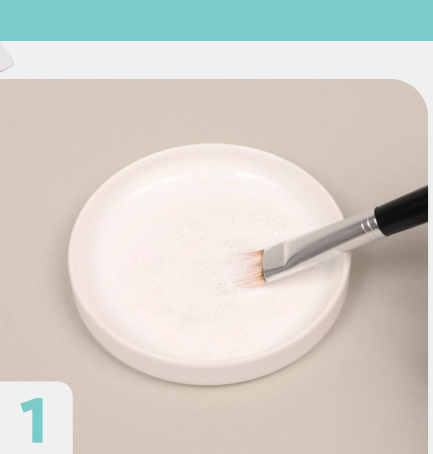

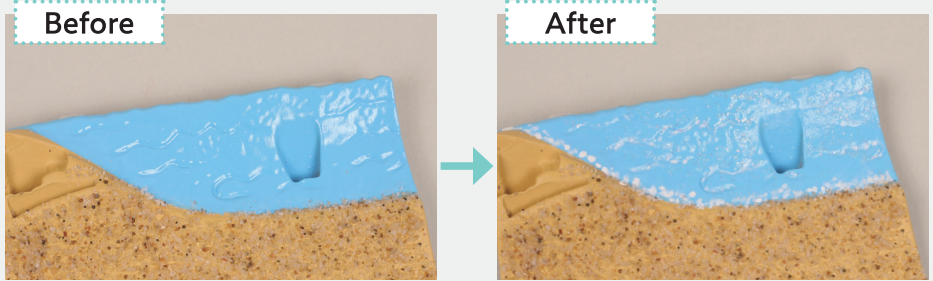

The Circuit Board Cables have also been added to the Shelving Boards on the upper side of the doghouse.

For those who wish to add extra details to the sea

Modellers who wish to can apply white paint to the sea area of the Ground in the 【Sandcastles】 scene to simulate the frothing waves and shimmering sea surface.

Let's start by simulating the frothing waves. First, squeeze the white paint out onto a palette and dilute it with about twice as much water. Then, add 2-3 drops of neutral detergent and mix it well.

Dip a liner paintbrush into the paint and apply it to where the sea meets the beach and the seaside. Hold the brush vertically and make large and small dots with the brush tip.

Apply the paint to the wave-shaped indentations in the same manner.

Then simulate the shimmering sea surface. Take a little lamé paint, mix it with neutral detergent and apply it to the sea surface.
