

【Winter, Skiing】

In this issue

Trees, Chairlift Seats

【The Peanuts Gang, Out Together】

Back Wall, Ground

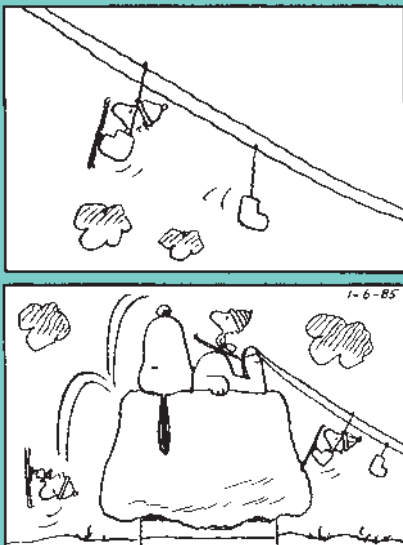

In this issue

The parts in this issue are the Trees to be assembled on the Ground and Chairlift Seats for the 【Skiing】 scene. Also included are the Back Wall and Ground parts for the 【Out Together】 scene.

TREES, CHAIRLIFT SEATS

We will assemble the Trees on the Ground of the 【Skiing】 scene, and set the sock-like Seats along the Chairlift Cables.

In the 6th January 1985 comic strip, Woodstock and friends are seen ascending a sock ski lift, before we discover Snoopy at the top, role-playing as a hill.

BACK WALL, GROUND

We will also start assembling the 【Out Together】 scene by first assembling the Back Wall to the Floorboard, and securing the Ground with Screws.

※ Actual parts may vary from the photos.

【The Peanuts Gang, Out Together】

Assembling the Back Wall and Ground

We will assemble the Trees on the Ground of the 【Skiing】 scene and set the sock-like Seats along the Chairlift Cables. We will also assemble the Back Wall to the Floorboard of the 【Out Together】 scene and secure the Ground with Screws.

- ① Wall×2 ② Back Wall ③ Ground ④ Trees A ⑤ Tree B ⑥ Trees C ⑦ Chairlift Seat×2
⑧ Screw (PB2.3×6mm)×7 (1 for spare) ⑨ Screw (PM2×4mm)×3 (1 for spare) ⑩ Screw (PM2×6mm)×3 (1 for spare)

Parts of issue 94

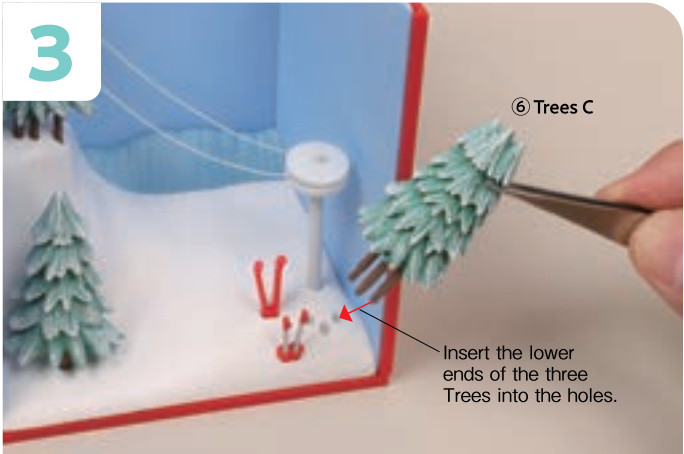

※①, ⑨ and ⑩ will be used in the next issue.

※ The black Screws ⑧ and ⑩ are longer than ⑨.

【Winter, Skiing】

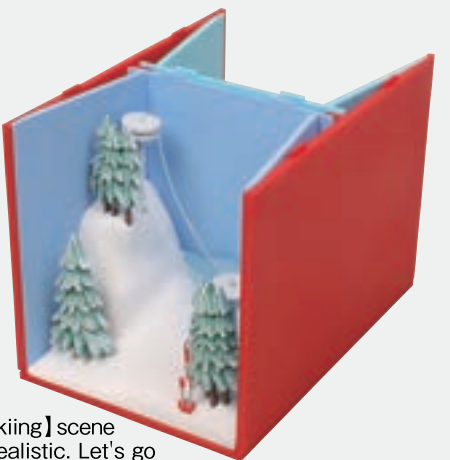

Making the Trees

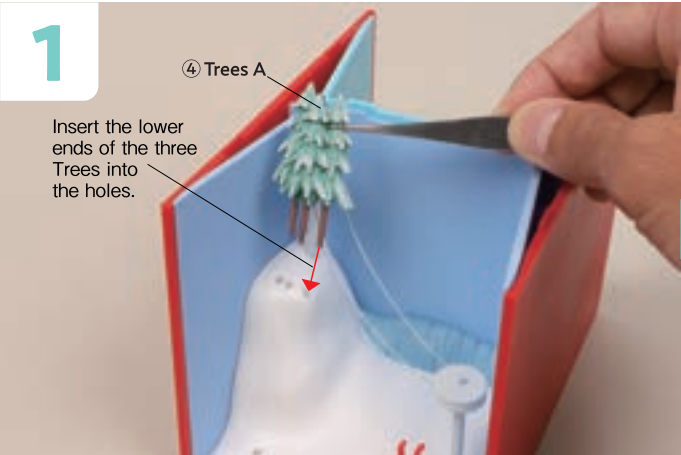

Then assemble ⑥ Trees C to the front right side of the Ground.

Issue 94
Completed

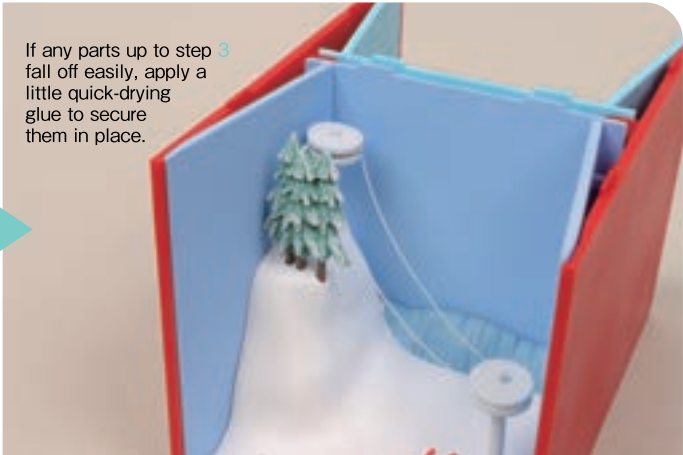

With the Trees added to the Ground, the 【Skiing】 scene is now getting more realistic. Let's go on to set the Seats along the Chairlift Cables.

MAKING THE TREES

Get ready the 【Skiing】 scene assembled in issue 93, and assemble ④ Trees A to the rear left side of the Ground.

If any parts up to step 3 fall off easily, apply a little quick-drying glue to secure them in place.

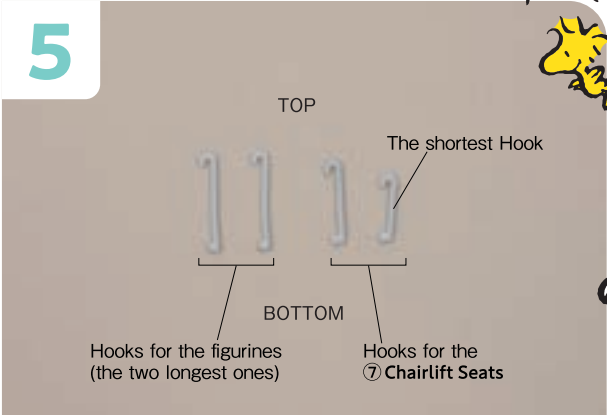

Assemble ⑤ Tree B to the front left side of the Ground in the same manner.

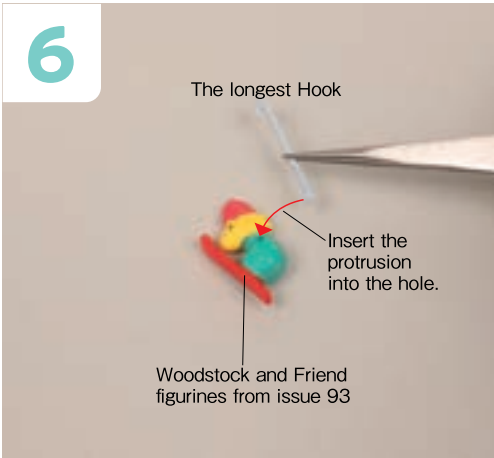

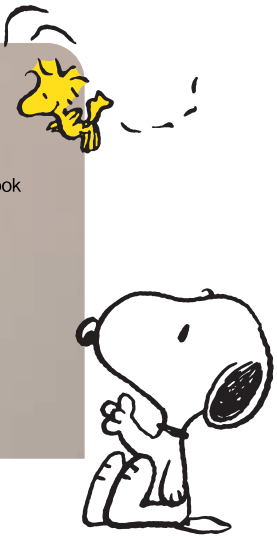

MAKING THE CHAIRLIFT SEATS

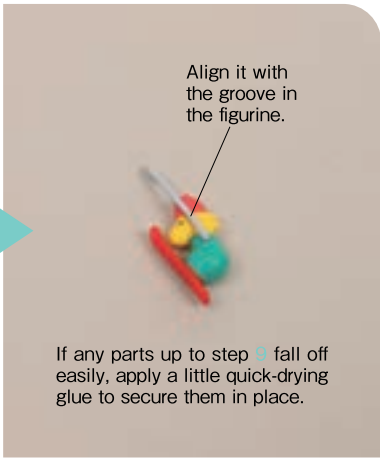

Get ready the Hooks from issue 93, and cut the seams with a cutter to take them out.

The Hooks come in three lengths.

Get ready the Woodstock and Friend figurines from issue 93 and assemble the longest Hook.

If any parts up to step 6 fall off easily, apply a little quick-drying glue to secure them in place.

Assemble the longest Hook to another figurine of Woodstock and Friend in the same manner, making two sets in total.

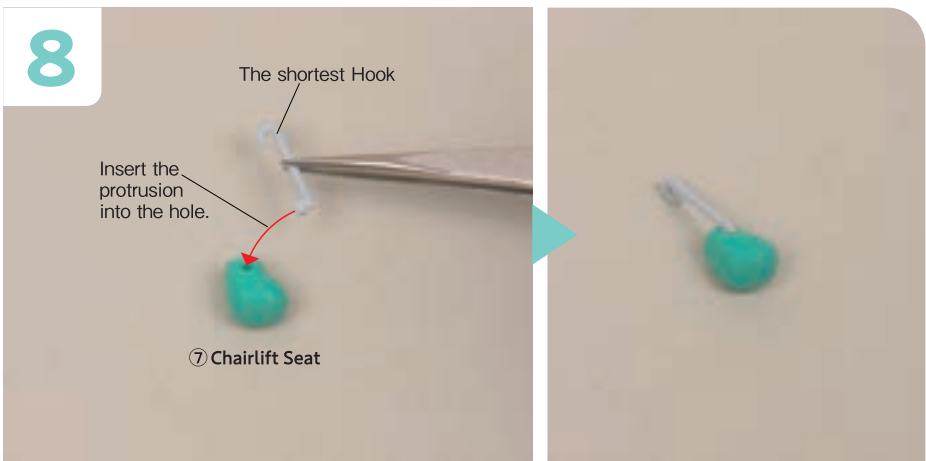

ASSEMBLY INSTRUCTIONS

【The Peanuts Gang, Out Together】

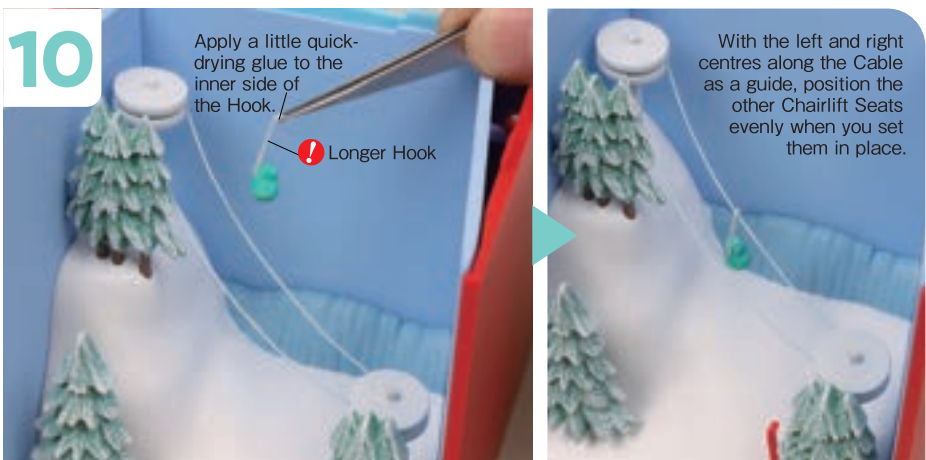

Making the Chairlift Seats

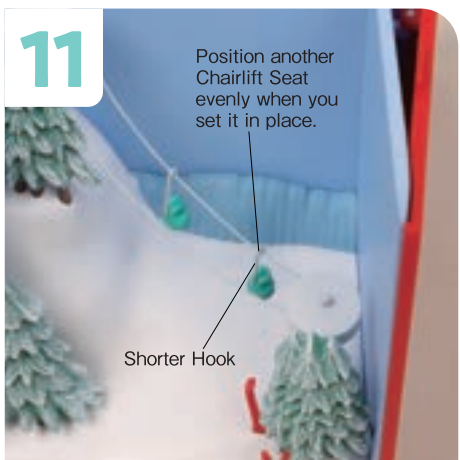

Assemble the shortest Hook to the ⑦ Chairlift Seat in the same manner.

Then assemble the remaining Hook to another ⑦ Chairlift Seat.

Now set the Chairlift Seat assembled in step 9 onto the Cable at the back. Apply a little quick-drying glue to the Hook and hang it up on the Cable as shown to set it in place.

Set another Chairlift Seat in the same manner.

Then set the Chairlift Seats assembled in step 7 onto the front Cable. Position them evenly, taking care not to overlap with the Seats at the back.

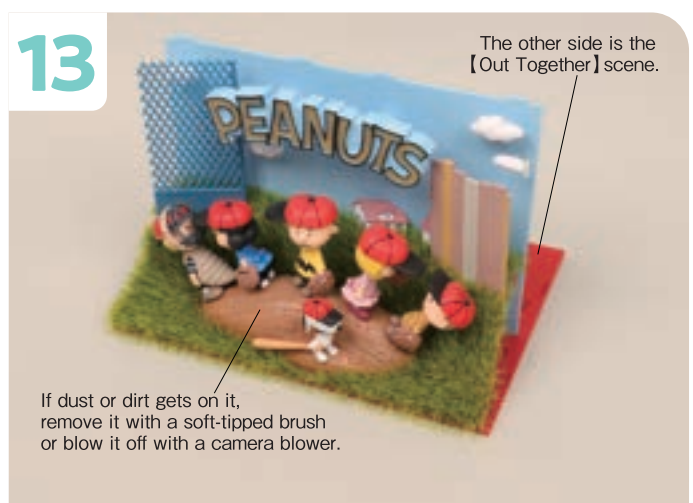

Issue 94 Completed

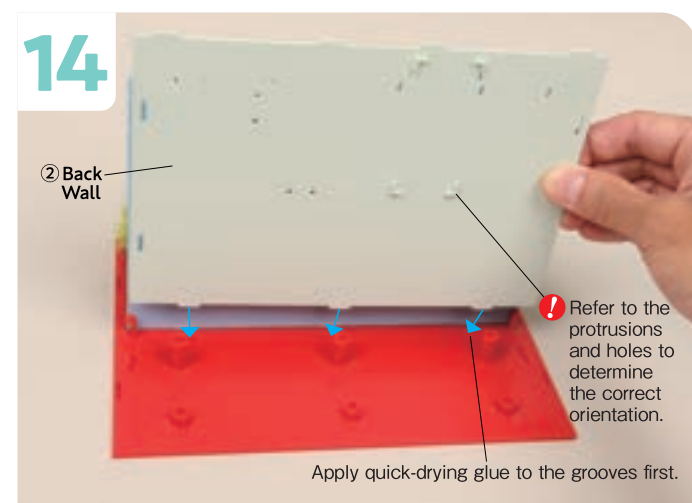

With the Chairlift Seats and the Woodstock and Friend figurines added, the [Skiing] scene is now complete.

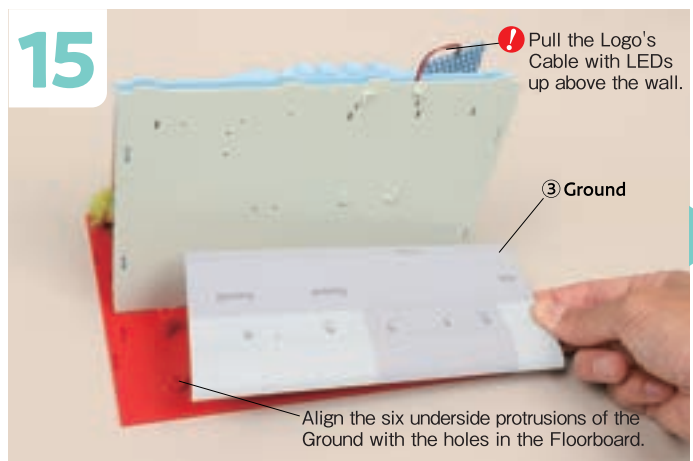

ASSEMBLING THE BACK WALL AND GROUND

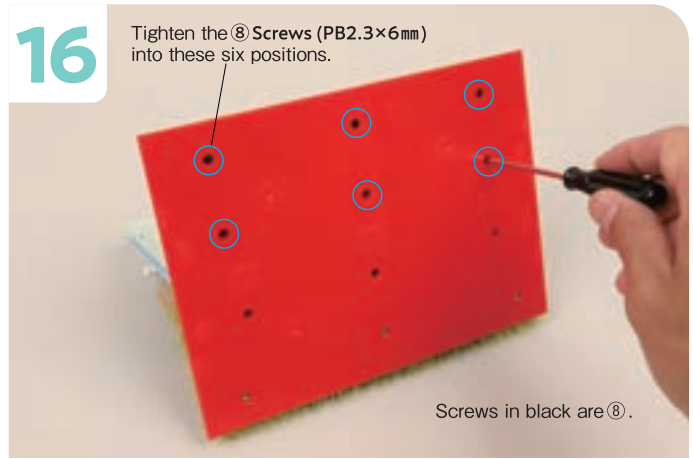

Get ready the [Baseball Team/Out Together] scene box previously assembled.

Assemble the ② Back Wall to the [Out Together] side of the Floorboard as we did before.

Now assemble the ③ Ground to the Floorboard. Align its six underside protrusions with the holes in the Floorboard.

Carefully tilt down the scene box while pressing on the Ground to prevent it from falling off. Tighten the ⑧ Screws (PB2.3×6mm) into the six positions circled in blue on the underside of the Floorboard as shown.

Issue 94 Completed

Please take good care of the two ① Walls, three ⑨ Screws (PM2×4mm) and three ⑩ Screws (PM2×6mm) as they will be used in a later issue.
