※ Due to the model's design, the shapes of some parts may differ from those of the real vehicle.

step 1 Attach the Rear Subframe to the Floor Panel

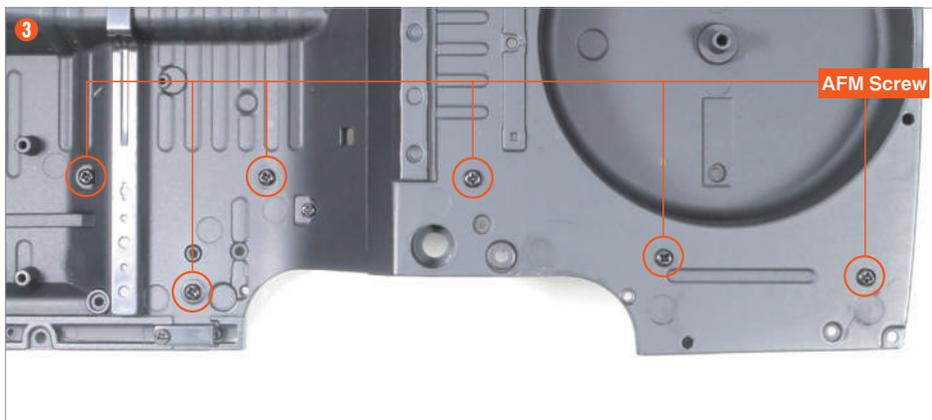

Rear side of the Floor Panel assembled up to Issue 21

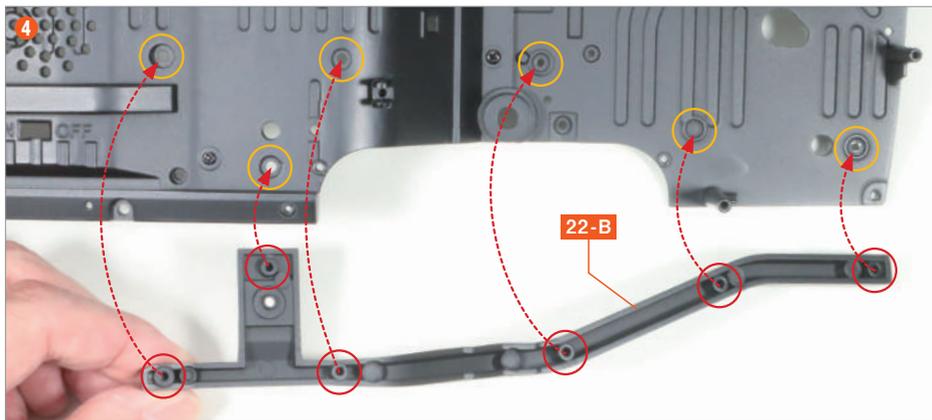

Prepare the Floor Panel assembled up to Issue 21 and turn it over. Align the raised screw bosses (red circles) on **Rear Subframe (L) 22-A** with the recessed screw holes (yellow circles) on the Floor Panel, then press into place.

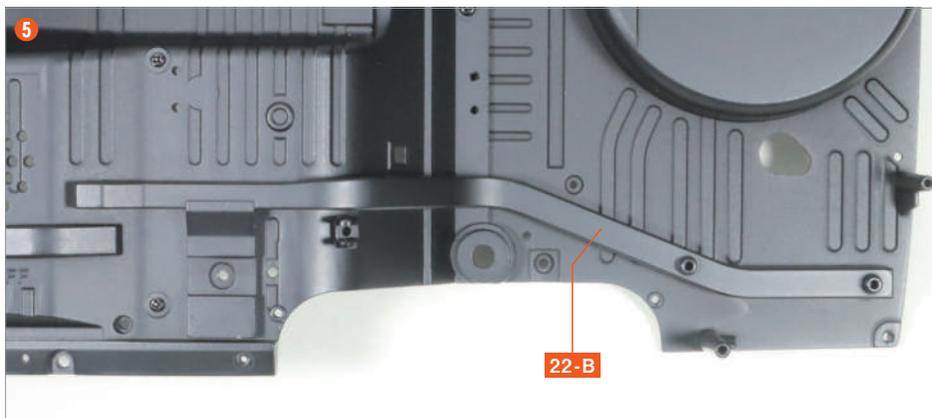

Rear Subframe (L) **22-A** fitted in place.

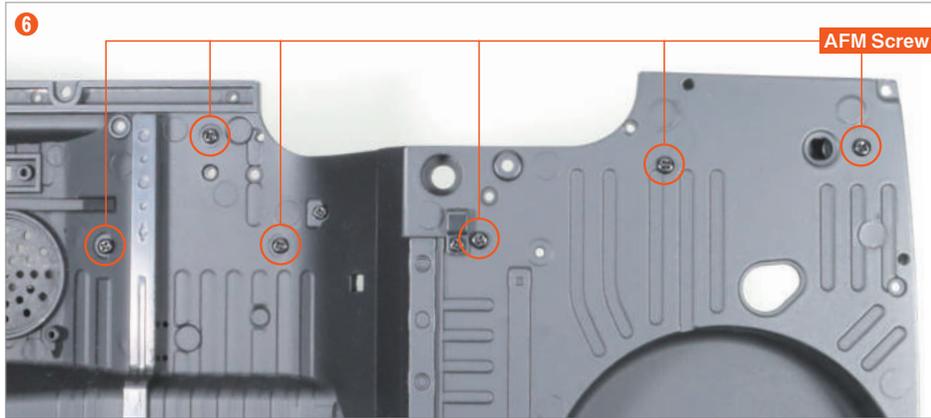

While holding **22-A** to prevent it coming loose, turn the assembly over and secure it at six points with **AFM Screws**.

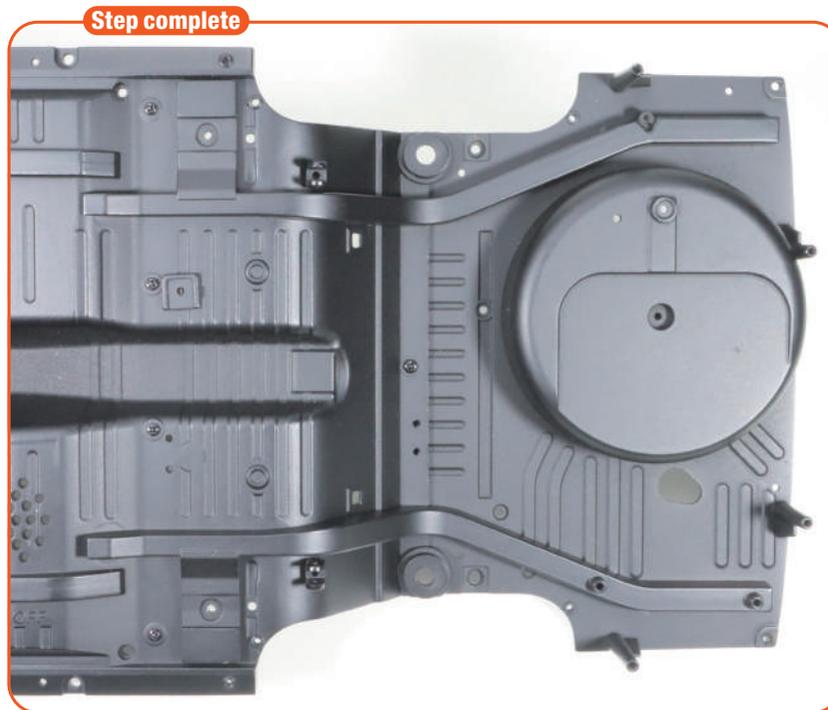

On the opposite side, align the raised screw bosses (red circles) on **Rear Subframe (R) 22-B** with the recessed areas (yellow circles), then press into place.

22-B fitted in place.

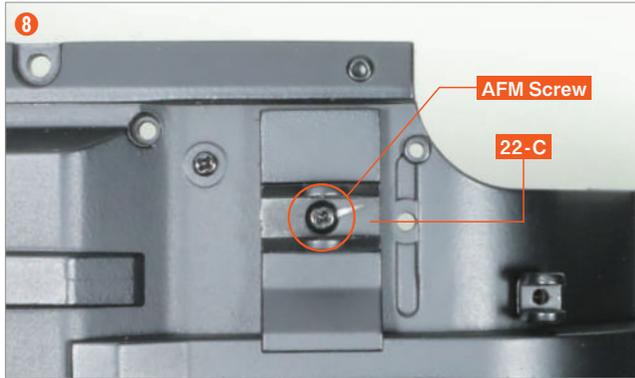

Hold **22-B** in place to prevent it from coming loose, turn the assembly over, and secure it at six points with **AFM Screws**.

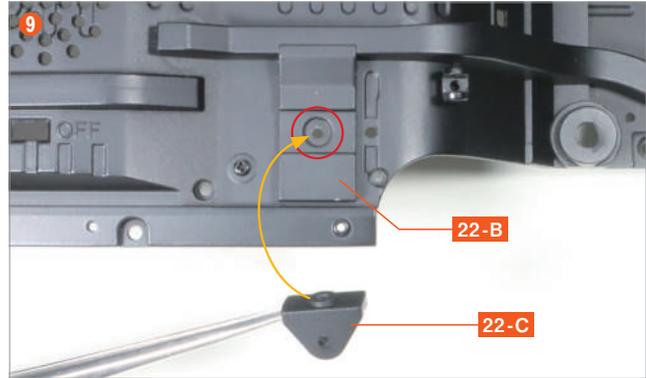

step 2 Install the Lower Control Arm Brackets

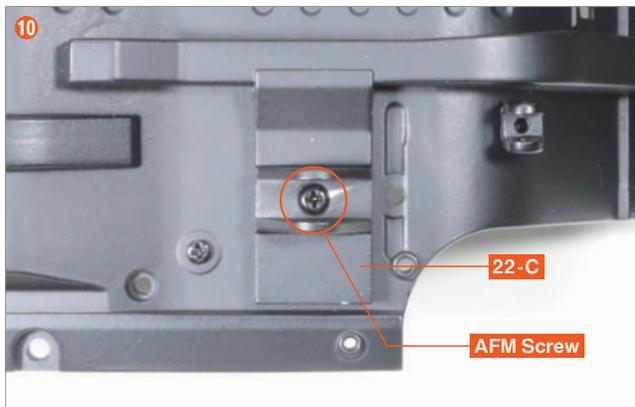

Align the bosses on **Lower Control Arm Bracket 22-C** with the recessed screw holes on **22-A** and press into place.

Secure **22-C** from above with **AFM Screws**.

On the opposite side, align the bosses of the other **22-C** with the recessed screw holes on **22-B** and press into place.

Secure **22-C** from above with **AFM Screws**.

Step complete

Complete

The assembly for Issue 22 is complete.
The Floor Panel is fully assembled.
In Issue 23, assemble the Propeller Shaft.
